NEWTON COLLECTION

SOLDIERS' MONUMENT.

Erected July 23, 1864.

THE SOLDIERS' MONUMENT.

At a Town Meeting of the inhabitants of Newton, held on the 7th day of August, A. D. 1863, a committee was chosen with authority to erect a Monument to the soldiers of Newton who had fallen in the war of the Rebellion.

In order that all might share in this grateful tribute, a donation of one dollar was solicited from each inhabitant, and nearly twelve hundred dollars were received from this source. More than eleven hundred children of the public schools contributed each one dime; and the remainder necessary to construct the Monument, to grade and surround the lot with a suitable curb-stone, together with the erection of an appropriate entablature, has been cheerfully contributed by the generous friends of the soldiers in the Town.

The Monument itself, with the entablature, cost \$3,975 50

The curb-stone and posts 1,245 00

The work has been completed at an expense of \$5,220 50

It stands in the Cemetery, upon a lot of land given by the Town. The Trustees of the Cemetery Corporation are to keep the grounds in good order and condition. The Monument is an octagonal shaft of Quincy granite, resting upon a die and plinths of the same material, and is twenty-eight feet in height. Upon the front of the die are inscribed the words, "*In Memoriam Perpetuam.*" Near the Monument is the entablature, on which is carved the motto, "*Pro patria mortui sunt,*" bearing the names of fifty-seven brave men of Newton, who offered up their lives in the cause of Freedom and the Union.

In the erection of this Monument, our patriotic citizens have gracefully performed a grateful public duty; and the work will stand as a perpetual honor to the brave heroes who have fallen, and to the noble spirit of our people.

JOS. BARNEY,		
JOHN WARD,		

NEWTON, Feb. 13, 1867.

SELECTMEN'S REPORT.

AGREEABLE to the official duty devolving upon us, we submit the following

ESTIMATE OF EXPENSES

for the Town, during the ensuing year, to wit:

Interest	\$10,500 00
Schools	41,500 00
Incidentals for Schools	4,000 00
Fire Department	2,500 00
Almshouse Expenses	2,500 00
Poor out of Almshouse	600 00
Repairs on Almshouse.....	500 00
Highways, Culverts, and Railings.....	9,000 00
Incidentals for Highways.....	4,000 00
Bridges	400 00
Salaries.....	5,000 00
Printing	1,500 00
Insurance	500 00
Incidental Expenses.....	1,300 00
Special Police.....	1,200 00
Total,	<u>\$85,000 00</u>

It will be seen that the estimate is increased to \$85,000.00 for the current year, and this only for the ordinary munic-

ipal expenses. The increase is occasioned by the additional outlays required by the steady growth of the Town, and is no more, perhaps, — proportionately to valuation, — than has often been necessary to assess in years past ; yet the fact is sufficient to admonish us that it is not good policy to augment our expenditures beyond what are actually necessary for the immediate welfare of the Town ; and, in this view, we may be excused from adopting measures that might ultimately prove advantageous, but whose benefits are not of present application. A great deal of our future growth depends upon the rate of taxation ; and it is not well to have too large a Town debt, or a too high rate of taxes ; and one or the other, or both, we must have, unless we use the most rigid economy in all our affairs. The Town debt has been increased the past year, owing to the outlays for the Auburndale schoolhouse, for gravel banks, teams for highway repairs, and other matters, which will be seen in the Auditor's Report. The State Tax, the present year, will be about five millions of dollars ; and, of course, Newton must pay her proper share.

The debt of the Town, over and above the cash assets, is \$150,935.24 ; being \$10,519.13 more than last year. The value of the Town's property is estimated at \$189,400.00, being a surplus above our debt of \$38,464.76. Although we could not dispose of this property to liquidate our debt, yet it is a fact that we could not replace it for a much larger sum.

SCHOOLS.

The appropriation called for to support our various public Schools, is \$41,500.00, and for incidental expenses of the same, the further sum of \$1,000 00 ; both items being considerably increased over last year. The schools, so far as we can learn, maintain their usual good standing, having competent and faithful teachers. They are institutions in which all good citizens cannot fail to take a deep interest, and to feel a just and laudable pride for their general excellence, and the present and prospective influence they exert. The cause of Education, particularly in a country like ours, penetrates to the very foundations of society. The permanence and utility of our political system rest upon the basis of popular intelligence.

The part taken by the citizens of Newton in giving timely assistance toward the establishment of the first Normal School in this Commonwealth, under the auspices and efforts of the lamented HORACE MANN, will be a memorable incident, ever most creditable to their private liberality and their public-spirited sagacity. It was doubtless the turning-point for the incorporation of these highly useful institutions into the public school system of the State, and their subsequent introduction into most of the Northern and Western States, from which they will also hereafter extend into the Southern States, since those States have been relieved from the incubus of slavery, which could not tolerate any system of Public Education.

The rapidly increasing growth of our population requires the erection of several additional buildings for Grammar and Primary Schools, to accommodate the wants of different sections of the Town. Should the Committee having this matter under consideration report in favor of providing necessary accommodations for Lower Falls, Upper Falls, Newton Centre, and Oak Hill, and the Town adopt their report, it will probably require an extra appropriation of about \$70,000.00.

FIRE DEPARTMENT.

The expenses in this department have been largely increased on account of the purchase of the "Empire" engine by the citizens of Newton Corner, and the same being subsequently assumed by the Town. The engine needed a considerable sum spent for repairs, and the department required a large additional quantity of new hose; of the latter, eight hundred feet have been furnished, and two hundred feet more must soon be supplied to complete its efficiency. We think the engine hardly suitable for the place, on account of the large number of men necessary to work it. The peculiar circumstances under which it was purchased, and the moderate price paid, are the only reasons which could warrant such a course.

The department is now in good condition, and, with the exception of the two hundred feet of hose above mentioned, well equipped; and probably the sum proposed in our estimate will be sufficient for all necessary repairs.

ALMSHOUSE.

The repairs at the Almshouse exceeded the last year's estimates, and were chiefly incurred in enlarging the barn, building a shed, and making other necessary improvements for keeping the teams employed on the highways. The amount specified for this year, it is believed, will be sufficient to meet all requisite expenditures upon the buildings.

With regard to the general management of the Almshouse, and the care taken of its inmates by their experienced, efficient, and humane Superintendents, we have the same good report to make as heretofore. No Town, we think, has its poor better provided for, with a corresponding degree of economy. We think the sum named in the estimate — \$3,100.00 — will meet the expense of supporting the poor in the house, and render such aid as may be necessary to the outside poor. A little timely assistance will often prevent parties from becoming a public charge. The number of inmates at the Almshouse during the year was 22; persons aided out of the house, 40; travellers assisted to two meals each and a night's lodging, 391.

HIGHWAYS.

The plan adopted by the Town last spring for highway repairs, has been put into operation. Some delay must of necessity follow all new modes of action. Teams were to be purchased, and a place for their keeping provided, which required time to accomplish. We now have three teams complete, with all the necessary tools, for repairing our highways

and sidewalks ; and the new system may now be considered in full operation, under the superintendence of Mr. John J. Ware.

We cannot speak so decidedly in regard to the utility of the plan as we should be glad to, on account of the limited experience which we have had. We, however, recommend its continuance for another year. By that time the Town will be able to judge of the wisdom of the change. It is proposed to have two more teams ready for use by the first of April, to be placed at Newton Corner, the other teams to be kept at the Town Farm. We think it best to arrange with some one at East Newton to do the work in that section, and save the expense of placing a team there.

With regard to the procurement of a "Stone Crusher," which was left discretionary with the Selectmen, we have not thought it advisable to purchase such a machine at present. We find on inquiry that there are doubts in the minds of practical road-builders concerning the expediency of using stone for common highways in a Town like this, which has no very heavy travel, and plenty of good gravel for road purposes. At least it is thought that crushed stone is chiefly needed in the road-bed through short distances, in the lowest situations on our travelled ways, and that the quantity thus required would hardly pay the expense of a Crusher.

The outlay in making arrangements for the new system has been quite large, the aggregate being swelled by the high

price of everything we are obliged to provide. The highway expenses have been unusually large, one item alone — the breaking out of the roads after the recent severe snow-storms — costing upwards of \$2,200.00.

DRAINAGE AT WEST NEWTON.

Among the subjects referred to the Selectmen at the last Town Meeting, was the matter of drainage at West Newton, near the depot, starting from the foot of Highland Street. The only necessity for a culvert there, is owing to the surface-water, which runs off the streets above, discharging into the ditch by the side of the railroad, so that it may occasionally, with other surface-water accumulating there, overflow the track. It is much more to the advantage of the railroad company than for the interests of the Town to have this water carried away; still, to satisfy all parties interested, we proposed to the railroad company that if they would pay one half the expense — estimated to be about \$2,000.00 — we would build a culvert running under their track, to the brook back of the Church, which would make the drainage complete for them and for the Town. They declined the offer, and made one of \$500.00, which we declined. We have since made such alterations in our streets as preclude the necessity of a culvert, and we should be unwilling to renew the offer, as it is a well-settled principle in law, that Towns are not obliged to take care of surface-water under such circumstances. In proof of the correctness of our position, we quote a recent decision

of the Supreme Judicial Court upon the legal principle involved :

“ The obstruction of surface-water, or an alteration in the flow of it, affords no cause of action in behalf of a person who may suffer loss or detriment therefrom, against one who does not act inconsistent with the due exercise of dominion over his own soil.

“ A party may improve any portion of his land, although he may thereby cause the surface-water flowing thereon, whencesoever it may come, to pass off in a different direction and in larger quantities than previously. If such an act causes damages to adjacent land, it is *damnum absque injuria*” (damage without wrong or injustice).

Another matter referred by the last Town Meeting to the Selectmen for their decision, was the question relative to the sale to Mr. Lemon of a piece of the Town Land, ten feet wide, at Newton Corner. We had a meeting upon the land with the petitioner, and decided not to sell in the manner he proposed to buy, because it would destroy a well-defined line, bounded as the Town's land now is by a brook, with a good wall most of the way on the east side, and Mr. Lemon would own a piece only ten feet wide and a considerable distance in length, which we think would materially injure the sale of the balance of the land ; especially if the river should be dredged out and made navigable, as will doubtless be the case before long. The gravel being all removed from this land, and the abutters fearing it may be sold for some purpose injurious to their estates, we recommend the Town to sell the same by public auction, that all who wish may have an opportunity to purchase.

NEW TOWN HALL.

Concerning this desirable improvement, we can only say that the great convenience of having a well-planned structure for the occupation of all the Town Officers, and containing a spacious hall, in which to hold Town Meetings, is fully recognized, and it should be provided at the earliest period practicable. But considering the already large Town debt, and the pressing need of more school accommodations, as well as the constantly increasing demands upon the Treasury for various other objects of immediate benefit to the Town, it is not, in our judgment, wise to recommend, at this time, such additional and very considerable expenditures as would be requisite for the erection and furnishing of a suitable Town Hall. We should be extremely glad to do so, were the circumstances more favorable, and trust that our inconveniences may be remedied within a very few years. As the matter is already in the hands of a competent and judicious Committee, we have no doubt it will receive that attention which its importance demands.

INSURANCE.

The amount paid for Insurance largely exceeded the estimate made last year to cover that item, from the fact that a large number of policies expired during the year. In consequence of the great fire in Portland, other policies were surrendered, the companies being obliged to close up their affairs,—the Town losing about \$100.00. The property has all been re-insured, and the premiums paid for five years

to come. The sum named in the estimate we think will be sufficient to cover this item, unless the Town add to their buildings.

There are other matters which we might, and should, allude to, for which no appropriation was made, were they not concisely stated in the Auditors' Report, to which we invite attention.

In submitting these remarks upon the above Estimate, the Board have been actuated by a desire to explain, as briefly as possible, what might seem to need explanation in the expenditures of the several departments the past year. In calling attention to these matters, the Board are simply desirous of discharging their manifest duty, feeling well assured that all the varied interests of the Town may be safely committed to the hands of its citizens,

All of which is respectfully submitted.

THOMAS RICE, JR.,	} <i>Selectmen</i> <i>of Newton.</i>
SAMUEL F. DIX,	
F. A. COLLINS,	
ORRIN WHIPPLE,	
J. F. C. HYDE,	

NEWTON, Feb. 13th, 1867.

REGISTRAR'S REPORT FOR 1866.

THE following statistics of Births, Intentions of Marriage, Marriages, and Deaths, in Newton, prepared by the Clerk, are for the year 1866:

BIRTHS.

Whole number for the year	223	IN THE DIFFERENT VILLAGES.	
Males	108	Newton Corner	54
Females	115	West Newton	49
	<u>223</u>	Upper Falls	32
Of American parents	109	Newton Centre	27
Of Irish parents	95	North Village	17
Of English parents	12	Newtonville	13
Of other foreign parents	7	Auburndale	13
	<u>223</u>	Lower Falls	12
More than year previous	25	Oak Hill and East Newton	6
			<u>223</u>

There were 28 others recorded, mostly those who were born in other places, and had removed into Newton previous to the time of taking the registration. These would be likely to have no record, if not recorded in Newton.

There were three cases of Twins during the year 1866.

The least number of births in any one month was 9, in February; and the greatest number was 29, in October.

INTENTIONS OF MARRIAGE.

The whole number of couples who received certificates was . . 83
 In which both parties belonged to Newton 45
 In which but one belonged to Newton 38
 Making 128 persons of Newton who entered their intentions, and who probably were all married; 1 person less than during the year 1865.

The record of Intentions of Marriage shows the true number of Newton people who are married, the law requiring a certificate from the City or Town Clerk where each party resides. There may have been one or two cases in town in which the parties to marriage left the State to be married; but in such cases the law requires them, if they return to live in the town or city where they lived previous to marriage, to leave with the Town Clerk a certificate of their marriage, within seven days, for record.

follows, viz.: in 1858 and 1859, one-fourth of all the deaths; in 1860, one-sixth; in 1861, one-seventh; in 1862, one in seven and three-fourths; in 1863, one in six and one-half; in 1864, one in five and one-half; in 1865, one in six and two-thirds; and in 1866, one in five and one-half. Of the twenty-one deaths by consumption in 1866, thirteen of them were young women in the bloom of womanhood. It becomes us all, but especially our young ladies, to inquire whether something more cannot be done as a preventive against this great disease of New England, which is ten times more to be dreaded than the cholera. We still recommend keeping the feet dry and warm, though the tyrant, Fashion, may again introduce thin-soled shoes; also to cover the head, when exposed to the weather, more than now is done; to take free exercise in the open air when the streets and fields are dry; and to sleep in apartments not much, if any, warmed, even in winter.

It is sad that about one-third of our deaths, usually, are under ten years of age. Does not this solemn fact call loudly upon mothers to inquire whether some improvement cannot be made in rearing their little ones?

POPULATION AND MORTALITY IN NEWTON FOR SEVEN YEARS PAST.

The following Table is very nearly correct, and will be of interest to the inhabitants of Newton:

In 1860	Population (U. S. Census)	8,382	Deaths 94	One in 89
1861	"	8,600	" 136	" 63
1862	"	8,700	" 93	" 94
1863	"	8,750	" 149	" 59
1864	"	8,850	" 135	" 66
1865	" (State Census)	8,978	" 127	" 71
1866	" about	9,100	" 116	" 78

Before the present Registration Laws were made, we probably failed to get many of the deaths from our Catholic population; but we think that is not the case now. Our Sextons and Superintendents of Cemeteries now understand the law, and generally refuse to bury until a proper return is made out, and a permit from the Clerk obtained. This being a fact, the above table may be relied upon as being very nearly or quite correct. It speaks well for our town. It appears that for the last seven years the average of deaths has been about one in seventy-four of our population, while the average mortality of our State has been about one in fifty-four. There is no doubt but that the high lands in the easterly part of our town contribute much to its healthiness, as they are the terminus of many of our damp easterly breezes in the spring of the year.

NEWTON CEMETERY.

The following are items taken from the Report of Mr. Henry Ross, the Superintendent of our Newton Cemetery, for the year ending Dec. 31, 1866, viz.:

“Number of lots selected 69
Two of which were selected by old subscribers 2

Leaving selected and sold to new parties 67

Eighty-seven lots have been fitted up during the year, and twenty-five partly fitted. There are fifteen lots graded and ready for use.

There has been expended on Lake Avenue about . . \$300 00

Sodding and flower-beds 100 00

For ornamental trees and shrubs 75 00

Repairing avenues and paths 124 00

\$599 00

Number of lots kept in repair by the Corporation, besides the Soldiers' Lot, 358. There have been fifty-nine first interments, and 33 removals from other cemeteries; making a total of 92 interments during the year.”

Thus we see that our families are fast finding a resting-place in our cemeteries. We hope no other one will do as the writer did, — neglect to prepare a house for the dead until a member of his family was ready to occupy it, — but, when the snow is gone, that those heads of families who have not selected a spot where the family group may be finally gathered, will visit our Cemetery for that purpose.

MARSHALL S. RICE, *Registrar.*

Newton Centre, Feb. 5, 1867.

RULES AND REGULATIONS

FOR THE

GOVERNMENT OF TOWN MEETINGS.

APPROVED BY THE COURT, DEC. 29, 1857.

1st. No final vote shall be reconsidered, unless the person moving the same shall have made a declaration of his intention to do so at the time of its adoption, and shall have been one of the majority, acting thereon; and no article in any warrant shall be again taken into consideration, after it has been disposed of, unless ordered by a vote of two-thirds of the voters present.

2d. No person shall speak more than twice upon any question, without first obtaining leave of the meeting, except for the correction of an error, or to make an explanation; and not until others, who have not spoken upon the question, shall speak, if they desire it.

3d. All motions submitted for consideration of the Town, shall be in writing, if so required by the presiding officer, or by the meeting.

4th. Every person speaking shall address the chair, standing and uncovered.

5th. No vote fixing the period for closing a ballot shall be reconsidered after such ballot shall have commenced; but it may be in order to extend the period without such reconsideration.

6th. Committees shall be nominated by the presiding officer of the meeting, unless otherwise ordered by a vote of two-thirds of the voters present; and in nominations at large, no person shall nominate more than one member of such committee.

7th. All motions to lay on the table, to take from the table, to take any article from its regular order, or to change the order of business, shall be decided without debate.

8th. The duties of the presiding officer shall be determined by the code of Rules governing the presiding officer of the House of Representatives of this Commonwealth, so far as they are adapted to the condition and powers of the Town.

BY - LAWS.

APPROVED BY THE COURT, DEC. 29, 1857.

COLLECTION OF TAXES.

Art. 1. The assessment of all taxes shall be completed and a list of the same delivered to the Collector on or before the first day of July of each year.

Art. 2. The appointed time for collecting poll taxes of persons having no other tax, shall be from the 20th to the 31st of July, and all other taxes from the 10th to the 20th of November of each year.

Art. 3. It shall be the duty of the Collector, during each of said periods, to appoint at least eight different times and places in different parts of the town, when and where he will meet the inhabitants and receive their taxes; and he shall, immediately after receiving the tax-list from the assessors, make out the tax-bills, and send the same to each of said inhabitants and each non-resident, as he can find, with a notice thereon of said times and places, and the penalties of non-payment of said taxes; and the town shall furnish printed blanks for the use of said Collector.

Art. 4. At the expiration of the time appointed for said payment of taxes, the Collector shall issue a summons to all delinquents, and if any taxes remain unpaid more than ten days after the service of said summons, the Collector shall immediately proceed to collect the same with legal fees therefor.

REPORTS OF COMMITTEES.

No action shall be had at any Town meeting on the report of any Committee previously chosen, unless the same shall be specially notified in the warrant for calling said meeting.

PASTURING OF CATTLE OR OTHER ANIMALS IN STREETS AND WAYS.

No person shall pasture cattle or other animals in or upon any of the streets or ways in the Town of Newton, either with or without a keeper, under the penalty of five dollars for each and every such offence; and it shall be the duty of the Selectmen to prosecute every violation of this By-Law; and all fines or penalties collected for such offences, shall be paid to the Treasurer for the use of the Town.

BY-LAWS OF THE TOWN OF NEWTON
CONCERNING
Truant Children and Absentees from School.

ADOPTED MARCH 2, 1863.

Sec. 1. The Town of Newton hereby adopts the provisions of the forty-second Chapter of the General Statutes of this Commonwealth, so far as applicable to Truant Children and Absentees from school; and all the provisions of the two hundred and seventh Chapter of the Acts of 1862, and the several Acts in addition thereto, or in amendment thereof.

Sec. 2. Any person convicted of any offense described in said Acts, or either of them, shall be punished by fine not exceeding twenty dollars, or by confinement in any institution of instruction, house of reformation, or suitable situation, which shall be provided for the purpose, for a term not exceeding one year.

Sec. 3. The Selectmen of the Town shall provide a suitable lockup, or institution of instruction, or house of reformation, or some other suitable place in the Poor-house belonging to the Town, or some other place in the Town aforesaid, or in the County of Middlesex, which shall be assigned and used for the confinement of persons convicted and sentenced to confinement under said Acts.

Sec. 4. Three Truant Officers shall be annually chosen in the Town of Newton, at its Annual Meeting in March, to serve one year, whose duty it shall be to make complaints of all persons who have violated any provisions of the Acts aforesaid, or either of them.

Sec. 5. The Selectmen of the Town shall fix the amount of compensation of said Truant Officers, for their services, as they shall think just, and the sum shall be paid from the Treasury of the Town.

Sec. 6. It shall be the duty of the School Committee, and of the Teachers of the Public Schools in said Town, to report the name of every person or persons violating any or either of said Acts, to the Truant Officers of the Town, that they may be complained of therefor.

To the foregoing By-Laws, the following was appended, viz. :

SUPERIOR COURT. SUFFOLK, SS. January Term, 1863. I approve the By-Laws of the town of Newton, relative to Truant Children and Absentees from school, hereto annexed.

THOMAS RUSSELL,
Justice of Superior Court.

MARCH 2d, 1863.

1868.

SOLDIERS' MONUMENT.

Erected July 23, 1861.

THE SOLDIERS' MONUMENT.

AT a Town Meeting of the inhabitants of Newton, held on the 7th day of August, A.D. 1863, a committee was chosen with authority to erect a Monument to the soldiers of Newton who had fallen in the war of the Rebellion.

In order that all might share in this grateful tribute, a donation of one dollar was solicited from each inhabitant; and nearly twelve hundred dollars were received from this source. More than eleven hundred children of the public schools contributed each one dime; and the remainder necessary to construct the Monument, to grade and surround the lot with a suitable curb-stone, together with the erection of an appropriate entablature, has been cheerfully contributed by the generous friends of the soldiers in the Town.

The Monument itself, with the entablature, cost \$3,975 50

The curb-stone and posts 1,245 00

The work has been completed at an expense of \$5,220 50

It stands in the Cemetery, upon a lot of land given by the Town. The Trustees of the Cemetery Corporation are to keep the grounds in good order and condition. The Monument is an octagonal shaft of Quincy granite, resting upon a die and plinths of the same material, and is twenty-eight feet in height. Upon the front of the die are inscribed the words, "*In Memoriam Perpetuam.*" Near the Monument is the entablature, on which is carved the motto, "*Pro patria mortui sunt,*" bearing the names of fifty-seven brave men of Newton, who offered up their lives in the cause of Freedom and the Union.

In the erection of this Monument, our patriotic citizens have gracefully performed a grateful public duty; and the work will stand as a perpetual honor to the brave heroes who have fallen, and to the noble spirit of our people.

Average number of poor supported in Almshouse during the year,	23½
Number of inmates, Feb. 13, 1868,	23

The Auditors take this opportunity to express their entire satisfaction with the management of the Almshouse. We consider the Town fortunate in being able to retain the present worthy Warden and Matron. The true spirit of economy in which they have ever conducted the affairs of the house and farm, is never suffered to detract from that kindness of manner and sympathetic spirit in which the aid of the Town should ever be extended to the unfortunate class placed in their charge. The hospitalities of the Town are greatly enhanced by the medium through which they are extended.

POOR OUT OF ALMSHOUSE.

NEWTON, Feb. 13, 1868.

SELECTMEN'S REPORT.

By vote of the Town, the Selectmen are required to give an estimate of the probable wants of the Town for the ensuing year; and, in compliance with that vote, we present this estimate of the current fiscal expenses, for the consideration of the Town, And in presenting the same, we wish to be understood that it is only to provide for the several items named in the schedule, and to say that any additional appropriations authorized, must be provided for by special grant, or added to the Town Debt. The building of School-houses, the purchase of a Steam Fire-Engine, and Alarm-Bell, the widening of Walnut Street, the drainage of Washington Street at Newton Corner, and the purchase of land for the purpose of erecting a building for the Steam Fire-Engine, and a stable for keeping a suitable number of horses for the use of the steamer and for highway purposes, at Newton Corner, for which no appropriations were made, have considerably increased the debt of the Town during the past year. The Selectmen have no control over these expenses, as they are all ordered by votes of the Town. We have frequently called the attention of the people to these matters, and have recommended the most rigid economy in all our affairs, — at least until our debt, increased by the expenses of the late war, shall have been reduced. Very much of our future growth de-

pend upon the rate of taxation and the amount of the Town debt ; and while we favor all necessary expense for our present wants, we caution against making too liberal provisions for the future. The amount estimated for interest the current year (\$14,000 00) is sufficient, we think, to admonish all that our debt is already too large. The debt of the Town, over and above the cash assets, is \$220,778.00, being an increase since last year of \$69,842.00. The value of the Town property is estimated at 275,096.00, being a surplus over our debt of \$54,318.00. But as this property cannot be dispensed with, it still leaves our indebtedness \$220,778.00, to be provided for at some time.

ESTIMATE OF EXPENSES.

Interest	\$14,000 00
Schools	44,000 00
Incidentals for Schools	6,000 00
Fire Department	5,000 00
Almshouse Expenses	2,600 00
Poor out of Almshouse	1,000 00
Repairs on Almshouse	700 00
Highways, Culverts, and Railings	20,000 00
Bridges	400 00
Salaries	6,000 00
Printing	1,500 00
Insurance	1,000 00
Incidental Expenses	1,500 00
Special Police	1,300 00
Lighting Streets	3,000 00
New Engine-House and Barn	12,000 00
	<hr/>
	\$120,000 00

The Town Assessment for 1867 was \$153,990.88; Corporation Tax returned by State Treasurer, \$15,094.53; making an aggregate of \$169,085.41. The amount expended, and not included in the grant of March, 1867, was as follows: For New School-houses, \$61,500.00; Steam Fire-Engine, \$3,770.00; Fire Alarm Bell, \$600.00; expense on Walnut Street, \$3,820.00; Drainage at Newton Corner, \$1,791.00; Lighting Streets, \$1,358.00; Land at Newton Corner, for Engine-house, \$2,500.00; plans for new Town Hall, \$500.00; plans for Centre School-house and Upper Falls School-house, adopted by the Town, but rejected or not used by the Building Committees, \$850.00; making a total for these items of \$76,589.00.

SCHOOLS.

The appropriation called for by the School-Committee for the support of our various Public Schools, is \$44,000.00, and for Incidentals for Schools, the further sum of \$6,000.00; each item showing an increase over last year's appropriation, which is the natural consequence of the increase of our schools from year to year. If there be any one expenditure in which prodigality may be justified, it is in furnishing good school accommodations for the education of our children; and certainly no one can charge the Town with neglect in making all suitable provisions for this object. In all sections of the Town good buildings are provided, and the old school-houses are being replaced by those more com-

modious and more modern in their construction. During the past year, three new school-houses have been commenced and are nearly finished: one at Oak Hill, one at Lower Falls, and one at Newton Centre. We understand the residents at Newton Centre have contributed a large sum, in addition to the Town grant, for the purpose of beautifying the exterior of the building in that locality,—a fact which speaks well for their enterprise and public spirit in school affairs.

The school-house at the Lower Falls has been completed within the appropriation made by the Town, and was dedicated a few weeks since. A large number of our townspeople were present, and several from other towns, all of whom were pleased with the location and architectural design of the building. Every school-house which we dedicate, is not only a means of fitting the children who shall enter it for higher happiness and usefulness in their individual spheres of action, but a new ornament to our Town, a new instrument for the intellectual and social elevation of our community, and a fresh safeguard to republican liberty. We cannot overestimate the power of the public schools; they are the most powerful means of both developing and disciplining the minds of the generations as they pass along; pruning them here, directing them there, and stimulating them everywhere. They are the glory of New England; the basis of its great prosperity, and the source of its influence upon the industry, the legislation, and the thought of the people. But it is not our purpose or privilege to enter much into detail concerning the influence

of our educational system. We have an able and watchful School-Committee, to whom all our educational interests are confided, and to whom we are to look for a detailed statement of the condition and discipline of all our schools. The whole amount paid for school purposes during the past year, is \$106,909.20. The Town has now thirty-six schools, and employs forty-eight teachers, whose aggregate salaries amount to \$40,300.00. If this sum is not sufficient to compensate all liberally for their services, it should be increased, so that all may enter upon their work cheerfully, feeling that their efforts to faithfully discharge their duties are appreciated by the Committee and the Town. The Report of the School-Committee will accompany this Report in its distribution, and will show the condition and wants of all our schools, and such suggestions as they may think proper to make. Should the Town vote to enlarge the High School-house, and provide further accommodation for schools at the Upper Falls and at West Newton, an appropriation must be made to cover the expense, which will be not less than \$70,000.00

HIGHWAYS.

With regard to the system of repairing the highways, which has been in operation for the past two years, we think all must admit its convenience and ultimate economy, although the amount expended appears to be much larger than before its adoption. But it must be borne in mind, that highway incidentals and new roads are all included under one

head. For instance, the widening and grading of Walnut Street might very properly be called a new road. This much-needed improvement has been done during the past year. This street, as is well known, leads from Washington Street to the Cemetery, and is much travelled now, and will be more and more for years to come. The Cemetery is becoming a place of much interest and frequent resort to many of our citizens. Improvements are progressing there from year to year, to make the last resting-place of our departed friends as attractive as possible. There, also, stands that noble Monument, erected by the voluntary contributions of our people, which should be often visited, to keep ever fresh in our memories the patriotic services rendered, and the great sacrifices made, by our martyred soldiers.

Another large outlay has been made at Newton Corner for the drainage of Washington Street. This has all been done by the Superintendent, under the direction of the Selectmen. The Town instructed the Selectmen to do this work before the Committee on Drainage was appointed. That committee will make their report at the March meeting. These large improvements, and various smaller ones, have all been done by the Town teams and men, and the highways have been kept in good repair by the same means.

Another advantage, growing out of the new system, is the breaking out of roads, and the clearing of the sidewalks of snow by the use of the snow-plough. Nothing, we think, gives more general satisfaction to our people than the appearance of the snow-plough in each village immediately after the storm is over. The Town has now six valuable horses; also

carts, harnesses, ploughs, scrapers, snow-ploughs, and all the necessary implements for the building and repairing of our highways. And although there may be some who do not feel quite satisfied with the working of the system at present, we think a longer trial will convince all of the wisdom of the change.

There are incidental expenses connected with the repairing and building of our highways, under the present mode, which cannot be avoided ; for instance, we have lost two valuable horses the past year by sickness, which have been replaced by others. As accidents of this and other kinds are liable to happen at any time, to weaken our highway force, and as the highways cannot be neglected without danger to life and property, the Selectmen, in the absence of instructions, have taken the responsibility of keeping the force good. The whole expense of our highways during the past year, including incidentals and new roads, has been \$19,747.08. This amount was expended as follows : Building wall on Greenwood Street, \$165.00 ; Land for Gravel, \$736.52 ; Gravel and Land Damage on Highland Street, \$162.50 ; Bridges, \$288.53 ; Removing Snow, \$616.00 ; Highway Teams, \$3,046.72 ; Grading and Repairing Walnut Street, \$3,820.00 ; Building Culvert at Newton Corner, \$1,791.00,—leaving the ordinary Repairs and Improvements \$9,120.81.

The estimate made for this year is intended to cover the ordinary repairs and the purchase of horses and other things which may be needed for highway purposes, the widening

and grading of Moore Street, and the building of Saratoga Street at Newton Corner, the building of Cary Street at Newtonville, and the street laid out over the land of T. H. Carter, Esq., and the one running by the house of Dr. Renton, at Auburndale.

The Committee appointed by the Town in 1866, to take the whole subject of repairing our highways into consideration, reported that the Selectmen be authorized to purchase a stone-crushing machine, if, in their judgment, they deemed it expedient. We have not thought it expedient to purchase such a machine at present, as it would very much increase our highway expenses, without a corresponding benefit. If, however, the Town think otherwise, they had better so instruct their Selectmen. A Mr. Wattress has lately built a crushing machine. The Selectmen, with Mr. Rand, one of the Committee of 1866, witnessed the working of this machine, which was quite satisfactory, although some alterations were suggested. The price of the crusher is \$1,050.00. This does not, of course, include the steam-engine, boiler, belts, pumps, and other things necessary for running the machine, nor building to protect it: the whole would probably cost not less than \$3,000.00.

FIRE DEPARTMENT.

In consequence of the addition of a Steam Fire-Engine to our other apparatus for the extinguishment of fires, quite a large sum has been added to the estimate for the expense of

the Department. It is difficult to estimate what the expense will be, as we cannot tell how many men will be required to handle the steamer. We shall doubtless have to employ one man all the time as an engineer, and have several others under some pay who can be relied upon in case of fire. A considerable quantity of new hose will be required for the use of the steamer. The engine is all completed ; and the Selectmen, with the committee associated with them in the purchase, were present at the trial of the engine, which was entirely satisfactory, and they accepted the same for the Town, and it is now in the shop of the builders, Messrs. Hunneman & Co., insured under their policy, and will remain there, unless otherwise ordered by the Town, until the new brick engine-house, which is to be built at Newton Corner, is ready to receive it

The expense of the Department largely exceeded the estimate made last year, on account of the purchase of a Steam Fire-Engine and land for a building for the same, which was not contemplated when the estimate was made. The affairs of this Department are economically managed, and the engines and apparatus are in good condition. Some of the engines are without companies at present, but the engineers and stewards take good care of them ; so that, in case of fire, they can be readily put in operation by the citizens. This Department is sustained at a considerable expense to the Town. Still it could not safely be dispensed with. We recommend, when the new steamer arrives, to take the place of the hand-engines at Newton Corner, that one of these

engines be located at the North Village. The whole amount paid for this Department the past year is \$9,593.28: of this amount, \$3,770.00 was for the Steam Fire-Engine; \$2,500.00 for land for new engine-house at Newton Corner; \$603.24 for bell and tower on engine-house at West Newton; leaving the ordinary expense, \$2,720.04. We think \$5,000.00, in addition to the sum required to build the engine-house spoken of, will be sufficient for this Department.

ALMSHOUSE EXPENSES.

The estimate made for Almshouse expenses and poor out of Almshouse, we think, will cover these items. But it is impossible for us to do more than to judge by comparison of the expense of previous years for this purpose. Newton was among the first towns settled in Massachusetts, her history dating back to the year 1639, then under the name of "Newtown." By an act of the General Court, it received its present name Dec. 8, 1691. Many of the descendants of the early settlers claim aid or support from the Town. Sometimes these claims run back three or four generations, they having, for some cause, failed to gain any other settlement, or their ancestors for them. The investigation of these cases renders the office of Overseer of the Poor one of considerable importance and great responsibility. Probably not one half the claims made by other towns and cities against this Town for support of paupers are allowed by the Overseers. Were they allowed, without the most

careful investigation, sometimes requiring months in their examination, our expense would be double what it now is for the support of the poor.

It is not infrequent that we have very pressing appeals for assistance from those who have no settlement in the Town, sometimes by parties who have been overtaken by sickness, accident, or death in their families, when it would be cruel to deny them and send them empty away, and more cruel, perhaps, to send whole families to the State Almshouse, feeling assured that a little assistance, to help them along through a cold winter, would be a great charity to them, and would but slightly increase our expense for the poor out of Almshouse ; and feeling, also, that our course would commend itself to those who have intrusted us with this important duty, we render aid rather than allow any who make their causes known to suffer.

With regard to the general management of the Almshouse, and the care taken of the inmates, we have the same good report to make as heretofore. Although the Warden has filled the position of Superintendent of our Highways during the past year, his duties at the Almshouse and Farm have not been neglected ; and we have made arrangements with him to remain in the same position another year, at a salary of \$1,000.00. The Selectmen deem it proper to say, that their views and wishes, as Overseers of the Poor and of Highway Surveyors, have been faithfully carried out by the Warden, Mr. Ware, and that the manner in which he has discharged

his duty during the past year has been no less gratifying to the Board than advantageous to the Town. We think that, with the same economical management as heretofore, the sum named in the estimate (\$3,600.00) will be sufficient to cover these two items. The whole expense for maintaining the poor, in and out of Almshouse, during the past year, was \$3,799.00. The average number of inmates at the Almshouse, during the past year, was $23\frac{1}{2}$; persons aided out of the house, 50; travellers assisted to two meals each and a night's lodging, 445. The estimate for repairs on Almshouse this year is chiefly for painting and shingling the building.

INSURANCE.

The amount paid for Insurance during the past year largely exceeded the estimate made to cover that item, in consequence of the building of three school-houses, for which no provision was made in the estimate. We doubt the wisdom of paying large sums annually for Insurance; but, as we brought this subject before the Town at the March Meeting in 1862, and the expression was in favor of insuring the Town's property, the Selectmen feel that they have no discretion in the matter, and therefore continue to insure all our public buildings. The amount paid for the past three years is a little over \$3,300.00.

There are other matters which we might allude to in this Report, which we shall omit, as they are sufficiently stated under their appropriate heads in the Auditors' Report, to

which we refer for a minute detail of all our expenses. If, however, what we have said upon general matters shall have the effect to call the attention of the tax-payers to a close examination of all our expenditures, we shall have accomplished our purpose.

All of which is respectfully submitted.

THOMAS RICE, JR.,	} <i>Selectmen</i> <i>of Newton.</i>
F. A. COLLINS,	
D. C. SANGER,	
ORRIN WHIPPLE,	
J. F. C. HYDE,	

NEWTON, Feb. 13, 1868.

CHIEF ENGINEER'S REPORT.

FEB. 1, 1867. The Fire Department of Newton had six hand-engines, well furnished with apparatus, and in good working order. No. 1 at Lower Falls ; No. 3 at West Newton ; No. 4 at Upper Falls ; Empire and Nonantum at Newton Corner ; and No. 6 at the Centre. All have organized companies, with the single exception of No. 6 at the Centre.

May 1. The two companies at the Corner disbanded, since which time there has been no organized department in that village ; and there will be no re-organization until the new steamer is brought into service, when additional cisterns will be needed, to furnish a full supply of water.

The introduction of steam into the Fire Department of Newton, constitutes an era in this department, and we trust it will prove a most satisfactory arrangement, so that the town will have no cause to regret the investment. It will certainly do away with some annoying features invariably attending the working of the hand-engines.

The promptness with which the citizens of the Corner have come to the rescue, and voluntarily worked the engines at several fires, since the disbanding of the companies, is deserving of great credit, and for which they have the thanks of the Engineers.

Nos. 1, 3, and 4, have well-organized companies, and have rendered efficient service throughout the year. We commend the promptness and alacrity with which they have responded to the various calls, and the willing and valuable services they rendered in saving the property of our citizens.

The most valuable services were rendered at Lower Falls ; and the citizens of that village feel under great obligations to the Department for their services at four several fires during the year. Much property was saved through the promptness with which the firemen responded to the alarm.

In closing, we desire to earnestly call attention to the lack of water in the different sections of the Town, and to express the hope that prompt and efficient action will be taken by the Town to remedy the deficiency. We would also recommend that the Town furnish hose that may be attached to the force-pumps in the different mills in town where such pumps are situated.

SUMMARY.

No. 1 was at 8 fires, and worked at 6.

No. 4 " " 6 " " " 4.

No. 3 " " 11 " " " 7.

No. 3 also out eight times when it did not reach the fire.

GEO. PETTEE,

Chief Engineer of Fire Department.

NEWTON, Feb. 13, 1868.

REGISTRAR'S REPORT FOR 1867.

THE following statistics of Births, Intentions of Marriage, Marriages, and Deaths, in Newton, prepared by the Clerk, are for the year 1867; beginning with Jan. 1st, and ending with Dec. 31st:

BIRTHS.

Whole number for the year,	225	IN THE VILLAGES.	
Males	114	Newton Corner	48
Females	111	West Newton	39
	<u>225</u>	Newton Centre	38
Of American parents	122	Upper Falls	31
Of Irish parents	84	Newtonville	24
Of English parents	10	Auburndale	17
Of other foreign parents	9	North Village	13
	<u>225</u>	Lower Falls	11
More than year previous	2	Oak Hill	4
Colored, included in the above, 1			<u>225</u>

There were 26 others recorded, mostly those who were born in other places, and had removed into Newton, previous to the time of taking the registration; including three children of Missionaries, residents now of Newton, born in Turkey. These would be likely to have no record, if not recorded in Newton.

There were Twins in two instances during the year.

The least number of births in any one month was 13, in December; and the greatest number was 24, in October; and the same in November.

INTENTIONS OF MARRIAGE.

The whole number of couples who received certificates was . 110
 In which both parties belonged to Newton 57
 In which but one party belonged to Newton 53
 Making 167 persons of Newton who entered their intentions, and who, probably, were all married; 39 persons more than during the year 1866.

The record of Intentions of Marriage shows the true number of Newton people who are married; the law requiring a certificate from the City or Town Clerk where each party resides.

MARRIAGES.

The whole number of Marriages recorded in Newton for 1867, was 100 couples; 35 couples more than during 1866.

In which one or both parties belonged to Newton . . . 90 couples.

In which neither party belonged to Newton 10 “

Some from other places come into Newton to be married, but more go out—all the Catholics.

The greatest number of marriages in any one month was 15, in December; and the least number was 2, in March.

The first marriage of 176 persons.

The second “ 24 “

200

We are glad to see evidence in the above, that the young people of Newton are beginning to conclude that it is not necessary for them to wait until they can commence where their parents leave off.

DEATHS.

The whole number of deaths, in Newton, in 1867 was 133, which is 17 more than in 1866; 6 more than in 1865; and 2 less than in 1864. Males, 67; Females, 66.

The oldest person who died in Newton, during the year, was Daniel Moriarty, who was 87 years of age.

DISEASES.	AGES.
Consumption 23	Under 10 years of age 45
Dysentery 6	Between 10 and 20 years of age, 7
Other Bowel Complaints . . . 7	“ 20 30 “ “ 10
Heart Disease 5	“ 30 40 “ “ 16
Old Age 5	“ 40 50 “ “ 10
Typhoid Fever 7	“ 50 60 “ “ 16
Accidents 3	“ 60 70 “ “ 9
Croup 3	“ 70 80 “ “ 12
Scarlatina 2	“ 80 90 “ “ 8
Other Diseases 72	
<hr/> 133	<hr/> 133

By the above return, the proportion of deaths to the population has been 1 in about 70. Consumption still leads as a disease among us, and its proportion of the deaths for the last ten years has been as follows; viz.: in 1858 and 1859, one fourth of all the deaths; in 1860, one sixth; in 1861, one seventh; in 1862, one in seven and three fourths; in 1863, one in six and one half; in 1864, one in five and one half; in 1865, one in six and two thirds; in 1866, one in five and one half; and in 1867, one in about six. It becomes us all, but especially our young ladies, to inquire whether something more cannot be done as a preventive against this great disease of New England, which is ten times more to be dreaded than the cholera. We still recommend keeping the feet dry and warm, (though the tyrant, Fashion, may again introduce thin-soled shoes); also, to cover the head, when exposed to the weather, more than now is done (although Fashion may take away what little remains of our ladies' bonnets).

By reference to the above table, it will be seen that one third of all our deaths are of persons under 10 years of age. What can mothers do to carry safely through the straits of infancy and early childhood, more of the little ones intrusted mainly to their care?

POPULATION AND MORTALITY IN NEWTON FOR EIGHT YEARS PAST.

The following Table is very nearly correct, and will be interesting to the inhabitants of Newton:—

In 1860	Population (U. S. Census)	8,382	Deaths 94	One in 89
1861	"	8,600	" 136	" 63
1862	"	8,700	" 93	" 94
1863	"	8,750	" 149	" 59
1864	"	8,850	" 135	" 66
1865	" (State Census)	8,978	" 127	" 71
1866	" about	9,100	" 116	" 78
1867	" about	9,310	" 133	" 70

The above table may be relied upon as being very nearly correct; and although about one third of our deaths are of children under 10 years of age, and about one sixth by consumption, yet it speaks well for our Town. It appears that, for the last eight years, the average of deaths has been one in about seventy-four of our population; while the average mortality of our State has been about one in fifty-four.

MARSHALL S. RICE, *Registrar.*

Newton Centre, Feb. 7, 1868.

NEWTON CEMETERY.

THIS Cemetery, including the additions recently made to it, contains an area of about 65 acres, located about in the territorial centre of the town, extending from Homer Street to Beacon Street, with a front on Homer Street of about 1,000 feet, and on Beacon Street of about 500 feet.

Three hundred and ninety-four persons have selected lots in this Cemetery; and most of them have been graded, otherwise prepared, and used.

During the past year, six lots have been inclosed with granite, and a number of monuments and monumental tablets have been erected; among them is numbered the beautiful marble Monument erected by the children of the public schools of the Town, in grateful remembrance of that noble man, Dr. Henry Bigelow, so much beloved, and so long President of our Cemetery Corporation.

There are now twenty lots graded and ready for sale, and about as many more partly graded.

Lots located on our avenues, of the common size, and well graded, with four stone posts, can be had for about \$100.00; lots similarly prepared, located on the paths, about \$85.00; and smaller lots for a less price.

All the moneys received for lots are expended upon the grounds, in grading lots, avenues, paths, and for ornamental purposes. When the snow is gone, we invite the citizens of Newton who have not selected a spot where the family group may be finally gathered, to visit our Cemetery for that purpose.

RULES AND REGULATIONS

FOR THE

GOVERNMENT OF TOWN MEETINGS.

APPROVED BY THE COURT, DEC. 29, 1857.

1st. No final vote shall be reconsidered, unless the person moving the same shall have made a declaration of his intention to do so at the time of its adoption, and shall have been one of the majority, acting thereon; and no article in any warrant shall be again taken into consideration, after it has been disposed of, unless ordered by a vote of two thirds of the voters present.

2d. No person shall speak more than twice upon any question, without first obtaining leave of the meeting, except for the correction of an error, or to make an explanation; and not until others, who have not spoken upon the question, shall speak, if they desire it.

3d. All motions submitted for consideration of the Town, shall be in writing, if so required by the presiding officer, or by the meeting.

4th. Every person speaking shall address the chair, standing and uncovered.

5th. No vote fixing the period for closing a ballot shall be reconsidered after such ballot shall have commenced; but it may be in order to extend the period without such reconsideration.

6th. Committees shall be nominated by the presiding officer of the meeting, unless otherwise ordered by a vote of two thirds of the voters present; and in nominations at large, no person shall nominate more than one member of such committee.

7th. All motions to lay on the table, to take from the table, to take any article from its regular order, or to change the order of business, shall be decided without debate.

8th. The duties of the presiding officer shall be determined by the code of Rules governing the presiding officer of the House of Representatives of this Commonwealth, so far as they are adapted to the condition and powers of the Town.

BY-LAWS.

APPROVED BY THE COURT, DEC. 29, 1857.

COLLECTION OF TAXES.

Art. 1. The assessment of all taxes shall be completed and a list of the same delivered to the Collector on or before the first day of July of each year.

Art. 2. The appointed time for collecting poll-taxes of persons having no other tax, shall be from the 20th to the 31st of July, and all other taxes from the 10th to the 20th of November of each year.

Art. 3. It shall be the duty of the Collector, during each of said periods, to appoint at least eight different times and places in different parts of the town, when and where he will meet the inhabitants and receive their taxes; and he shall, immediately after receiving the tax-list from the assessors, make out the tax-bills, and send the same to each of said inhabitants and each non-resident, as he can find, with a notice thereon of said times and places, and the penalties of non-payment of said taxes; and the Town shall furnish printed blanks for the use of said Collector.

Art. 4. At the expiration of the time appointed for said payment of taxes, the Collector shall issue a summons to all delinquents, and if any taxes remain unpaid more than ten days after the service of said summons, the Collector shall immediately proceed to collect the same with legal fees therefor.

REPORTS OF COMMITTEES.

No action shall be had at any Town meeting on the report of any Committee previously chosen, unless the same shall be specially notified in the warrant for calling said meeting.

PASTURING OF CATTLE OR OTHER ANIMALS IN STREETS AND WAYS.

No person shall pasture cattle or other animals in or upon any of the streets or ways in the Town of Newton, either with or without a keeper, under the penalty of five dollars for each and every such offence; and it shall be the duty of the Selectmen to prosecute every violation of this By-Law; and all fines or penalties collected for such offences, shall be paid to the Treasurer for the use of the Town.

BY-LAWS OF THE TOWN OF NEWTON

CONCERNING

Truant Children and Absentees from School.

ADOPTED MARCH 2, 1863.

Sec. 1. The Town of Newton hereby adopts the provisions of the forty-second Chapter of the General Statutes of this Commonwealth, so far as applicable to Truant Children and Absentees from school; and all the provisions of the two hundred and seventh Chapter of the Acts of 1862, and the several Acts in addition thereto, or in amendment thereof.

Sec. 2. Any person convicted of any offence described in said Acts, or either of them, shall be punished by fine not exceeding twenty dollars, or by confinement in any institution of instruction, house of reformation, or suitable situation, which shall be provided for the purpose, for a term not exceeding one year.

Sec. 3. The Selectmen of the Town shall provide a suitable lock-up, or institution of instruction, or house of reformation, or some other suitable place in the Poor-house belonging to the Town, or some other place in the Town aforesaid, or in the County of Middlesex, which shall be assigned and used for the confinement of persons convicted and sentenced to confinement under said Acts.

Sec. 4. Three Truant Officers shall be annually chosen in the Town of Newton, at its Annual Meeting in March, to serve one year, whose duty it shall be to make complaints of all persons who have violated any provisions of the Acts aforesaid, or either of them.

Sec. 5. The Selectmen of the Town shall fix the amount of compensation of said Truant Officers, for their services, as they shall think just, and the sum shall be paid from the Treasury of the Town.

Sec. 6. It shall be the duty of the School-Committee, and of the Teachers of the Public Schools in said Town, to report the name of every person or persons violating any or either of said Acts, to the Truant Officers of the Town, that they may be complained of therefor.

To the foregoing By-Laws, the following was appended; viz.:

SUPERIOR COURT. SUFFOLK, ss. January Term, 1863. I approve the By-Laws of the Town of Newton, relative to Truant Children and Absentees from school, hereto annexed.

THOMAS RUSSELL,

Justice of Superior Court.

MARCH 2d, 1863.

SOLDIERS' MONUMENT

Erected July 23, 1864.

THE SOLDIERS' MONUMENT.

At a Town Meeting of the inhabitants of Newton, held on the 7th day of August, A.D. 1863, a committee was chosen with authority to erect a Monument to the soldiers of Newton who had fallen in the war of the Rebellion.

In order that all might share in this grateful tribute, a donation of one dollar was solicited from each inhabitant; and nearly twelve hundred dollars were received from this source. More than eleven hundred children of the public schools contributed each one dime; and the remainder necessary to construct the Monument, to grade and surround the lot with a suitable curb-stone, together with the erection of an appropriate entablature, has been cheerfully contributed by the generous friends of the soldiers in the Town.

The Monument itself, with the entablature, cost	\$3,975 50
The curb-stone and posts	1,245 00

The work has been completed at an expense of \$5,220 50

It stands in the cemetery, upon a lot of land given by the Town. The Trustees of the Cemetery Corporation are to keep the grounds in good order and condition. The Monument is an octagonal shaft of Quincy granite, resting upon a die and plinths of the same material, and is twenty-eight feet in height. Upon the front of the die are inscribed the words, "*In Memoriam Perpetuam.*" Near the Monument is the entablature, on which is carved the motto "*Pro patria mortui sunt,*" bearing the names of fifty-seven brave men of Newton, who offered up their lives in the cause of Freedom and the Union.

In the erection of this Monument, our patriotic citizens have gracefully performed a grateful public duty; and the work will stand as a perpetual honor to the brave heroes who have fallen, and to the noble spirit of our people.

In examining the Warden's accounts for the past year, the Auditors find that the affairs of the Almshouse continue to be conducted with the same careful fidelity and scrupulous regard for the best interests both of the Town and of the unfortunate poor, who are dependent upon its charity, which has always been so characteristic of the present Warden's management.

The citizens of the town are to be congratulated on being able to secure the services of the same Warden and Matron for the ensuing year.

SELECTMEN'S REPORT.

In accordance with our well established custom, we present the following estimate of the sums necessary to meet the expenses of the Town for the current year. Our debt has been increased the past year \$56,596.27, and is now \$277,374.31 above the available assets. The debt of the Town is quite large; yet when we take into consideration the large amount of property owned by the Town, — consisting of its numerous and well furnished school-houses, valued at \$298,000, of which sum, \$170,000 was expended during the last three years; the buildings, engines, and apparatus belonging to the Fire Department, valued at \$39,500; the value of the other property owned by the Town, amounting to \$45,500, making an aggregate of \$383,000; and taking into consideration that this property is mostly new, and that it is amply sufficient to meet the reasonable wants of the Town for some years to come; and also bearing in mind the general wealth of the Town, — the debt is comparatively light.

A town growing as rapidly as ours, requires liberal expenditures in its various departments, and they should be made; but much care should be taken that all the appropriations be judiciously expended, and, if possible, within the amounts appropriated for the several departments and special purposes.

ESTIMATE OF EXPENSES.

Interest	\$18,000 00
Schools	49,000 00
Incidentals for Schools	7,000 00
Fire Department	10,000 00
Almshouse Expenses	2,500 00
Poor out of Almshouse	1,200 00
Repairs on Almshouse	1,000 00
Highways, Culverts, and Railings	25,000 00
Bridges	1,000 00
Salaries	7,500 00
Printing	1,600 00
Insurance	1,000 00
Miscellaneous Expenses.	2,000 00
Special Police	1,500 00
Lighting Streets	7,000 00
Reduction of Town Debt	4,700 00
	<hr/>
	\$140,000 00

INTEREST.

The item for interest seems to be large, but is no greater than will be needed to meet the notes outstanding. There is a degree of satisfaction in knowing that the rate of interest paid is quite low, averaging less than six per centum.

SCHOOLS.

The sums recommended for Schools and for Incidentals for the same are large, but they are based upon the careful estimates of the School-Committee. No money is more cheerfully paid than this, for all classes recognize the advantage of education.

HIGHWAYS.

We think no change should be made in the manner of repairing the highways. All will admit that the roads of Newton have been very much improved the past few years. We have now a considerable sum invested in horses, carts, and tools, procured expressly for highway purposes. It will be seen that we recommend for this department a larger sum than has ever before been appropriated, but no larger than will be needed for all purposes, including the building of a new street as laid out by the County Commissioners at Newton Centre, leading from Beacon Street, east of the depot, to near the Harbach place on Ward Street. This road we are ordered to complete before January 1st, 1870. Saratoga Street, at Newton Corner, is not yet completed, and will need a further sum for its completion.

All the main highways should receive a large share of attention; and, in some instances, broken stone may be used to advantage, for the purpose of repairing or improving the same. The Selectmen have not thought best, thus far, to purchase a steam stone-crusher for the purpose of preparing material for the highways. They have purchased some additional gravel-pits or lands, so that nearly all parts of the Town are well supplied with good material for road purposes, both building and repairing. During the year, the long-talked-of drain at West Newton has been built, and in a very thorough manner, at the joint expense of the Town and the Boston and Albany Railroad.

FIRE DEPARTMENT.

The purchase of a Steam Fire-Engine has caused heavy expenditures the past season. A house has been erected and furnished, in which to keep it; hose purchased for it; a competent Engineer employed, — all of which have tended to swell the expenses of the Fire Department. We estimate the cost of this department at \$10,000 for the current year. This is about the sum recommended to us by the Engineers of the Fire Department. A considerable portion of the same is to be used for the purchase of new hose. It is very important to be well furnished in this direction; for our engines, whether hand or steam, are of very little use unless there is sufficient hose to reach a supply of water. Another heavy item will be the purchase of a new hand-engine for the Lower Falls, which has been contracted for by the Engineers and Selectmen, to whom the subject was referred in Town-meeting. If the Town should vote to change the location of the engine-house at Lower Falls, under an article in the Warrant, the sum we propose will hardly be large enough to meet all the expenses of the Fire Department.

The introduction of a Steamer was an experiment with us; but there is no question as to its advantages over hand-machines when plenty of water can be had. We believe the Town should make liberal appropriations for reservoirs, especially in the villages. Few towns have been more fortunate than ours, both as to the efficiency of its Fire Department and the infrequency of fires. We hope the sum named will be appropriated.

ALMSHOUSE EXPENSES.

The sums we name in our estimate for the support of our Almshouse and the poor out of the Almshouse are not large when we remember that Newton is one of the oldest and largest Towns in the State. This department has been most admirably managed by our efficient Warden, aided by his no less efficient wife. The Town has reason to be grateful that it is in such good hands. Mr. Ware has been engaged for another year, and will, in addition to his duties as Warden at the Almshouse, act as Superintendent of the Highways, under the Selectmen.

INSURANCE.

The amount paid for Insurance the past year — \$2,615 50 — exceeds our estimate, on account of the new school-houses which have been built. The Town has about \$190,000 insurance upon its public buildings. By a carefully prepared estimate, we find that the net average cost, after deducting dividends on the mutual policies, will not exceed \$1,000 per year for a term of years.

LIGHTING STREETS.

Quite a large sum of money has been expended, the past year, for this purpose, and a still larger one will be required during the current year. Gas is used in all but two of the villages where there are street-lights. It is obtained of the Newton and Watertown Gas-Light Company, at an expense of twenty-five dollars for each lamp. It costs from five to

seven dollars a year, in addition, to light these lamps and keep them in repair.

We do not deem it necessary to extend our remarks; for the Auditor's Report is so full and clear that all may understand it, and see just what sums have been expended the past year in each department. We cannot close, however, without calling the attention of the tax-payers to the importance of attending the annual Town-meeting, when all the money for the year is voted, to see that no improper appropriations are made. It is desirable that the debt of the Town be not further increased, and we know there are many who would be glad to see a reduction of it each year.

Respectfully submitted,

NEWTON, Feb. 13, 1869.

REPORT OF ENGINEERS

OF THE

FIRE DEPARTMENT.

The steamer, named "Newton No. 1," and the house erected for it at Newton Corner, were transferred to the Fire Department by the Selectmen, Oct. 19, 1868. Since that time the steamer has been constantly in working order, proving its power and efficiency at several fires where it has worked. The greatest actual saving of property was in Watertown the third day of last December, on which occasion it put the first stream upon the fire, thereby preventing the spread of the flames to an adjoining row of wooden buildings, and probably was the direct means of saving property of greater value than the original cost of steamer and house. It also worked at another fire in Watertown, the 29th day of the same month, doing excellent service, and saving much property.

Jan. 24, 1869. On the burning of the oil and slaughter house of Boynton & Swallow, at Brighton, the Brighton Fire Department requiring assistance, sent to the Newton Fire Department for their steamer, which call was promptly responded to; and for two hours the steamer continued to pour water upon the burning ruins. The steamer was slightly damaged by an accident, and the injury was promptly repaired by the Brighton Fire Department.

In our own Town we have not so good a record. The steamer, like all other fire apparatus, can do but little good without water. It has been present at three fires in the Town, where much valuable property was destroyed, owing to the scarcity of water. The engineers feel they cannot too strongly urge the attention of the Town to the above

fact. The advantages of steam over hand engines are so apparent, we feel the Town will not regret the large expenditures on account of the same. We confidently assert, if we could have had the steamer at the fire in Wales's stable, or if our hose had been sufficiently long to have connected with the powerful pumps in the mills at Lower Falls, the hotel and large dwelling-house in the rear would have been saved; but as it was, the slight effort of the Lower Falls engine could but temporarily check the fire, delaying its progress for a few moments only.

The alarm bell on the steamer's house at Newton Corner is not sufficiently large to be heard by all the members of the hose company. Some action is necessary to overcome this difficulty.

The steamer turned out eight times, and was present at six fires.

The two hand engines at the Corner are without companies. It is thought best to retain "Nonantum No. 5" there as a reserve, but the "Empire" is not needed. The owner of the land upon which it is located is anxious to have it removed. It has been suggested that it should be placed at the North Village. Early action of the Town is very desirable.

At the burning of the Wales Hotel, June 6, 1868, the Lower Falls engine (as usual) was incapable of performing the service required. The Company refused to work on the engine again, and disbanded. The subject was referred to the Selectmen and Engineers, who unanimously decided to furnish a new hand engine, with modern improvements. Messrs. Hunneman & Co. have the order to build one, which they agree to deliver early in the spring. In the mean time they furnish a relief engine free of cost to the Town. A well organized company has it in charge, and are satisfied to serve upon it until the new one is received. They have promptly attended to drill duty, have worked the engine at six different fires, saving considerable property, and have turned out at five other alarms, but did not reach the fires.

The engine-house at the Lower Falls requires extensive repairs and alterations; it overhangs the river, and is not properly placed upon any foundation. There is no hose tower, which is all important for the preservation of hose. Hose rolled up wet, soon moulds and decays. We therefore earnestly urge the necessity of some definite action relative to this important subject.

The engine at the Centre is without a company. It is in good order, with leading officers appointed to take charge of it in case of fire in the immediate vicinity. At the burning of the Orphans' Home, June 14, 1868, the engine did much good service, saving one dwelling-house near the fire; but could not have performed much service had there not been a cistern of water in the yard; thoroughly demonstrating the value of cisterns filled with water. We think much praise is due to property holders who have cisterns of water within reach of the engines.

The Upper Falls and West Newton engines, have well organized and efficient companies, doing all regular drill duty, and promptly on hand in case of alarm of fire. They have worked at different fires, doing much valuable service, but the greater proportion of fires during the past year were in localities where not much if any water could be had. The Upper Falls turned out thirteen times, reached eight fires, and worked at two. The West Newton turned out twenty-five times, reached fourteen fires, and worked at ten.

A large additional amount of new hose is needed, especially in the steam department. A less amount of hose would answer, if the Town would take some action in relation to reservoirs in the several villages.

In closing, we express the earnest hope that a special appropriation will be made for the above purpose.

GEO. PETTEE, *Chief Engineer.*

NEWTON, Feb. 1, 1869.

REGISTRAR'S REPORT FOR 1868.

THE following statistics of Births, Intentions of Marriage, Marriages, and Deaths, in Newton, prepared by the Clerk, are for the year 1868; beginning with Jan. 1st, and ending with Dec. 31st:—

BIRTHS.

Whole number for the year,	261	IN THE VILLAGES.	
Males	140	West Newton	55
Females	121	Newton Corner	52
	<u>261</u>	Newton Centre	47
Of American parents	132	Upper Falls	32
Of Irish parents	106	Newtonville	27
Of English parents	15	North Village	19
Of other foreign parents	8	Lower Falls	15
	<u>261</u>	Auburndale	14
			<u>261</u>
More than in the year previous,	36		
Colored, included in the above,	1		

There were 34 others recorded, mostly those who were born in other places, and had removed into Newton previous to the time of taking the registration. These would be likely to have no record, if not recorded in Newton.

There were twins in one instance during the year.

The least number of births in any one month was 15, in February; and the greatest number was 27, in September; and the same in October.

INTENTIONS OF MARRIAGE.

The whole number of couples who received certificates was . . 112

In which both parties belonged to Newton 61

In which but one party belonged to Newton 51

Making 173 persons of Newton who entered their intentions, and who, probably, were all married; 6 persons more than during the year 1867.

The Record of Intentions of Marriage shows the true number of Newton people who are married; the law requiring a certificate from the City or Town Clerk where each party resides.

MARRIAGES.

The whole number of Marriages recorded in Newton for 1868, is 114 couples; 14 more than in 1867.

In which one or both parties belonged to Newton . . . 100 couples.

In which neither party belonged to Newton 14 “

Some from other places come into Newton to be married, but more go out — all the Catholics.

The greatest number of marriages in any one month was 16, in September; and the least number was 3, in January.

The first marriage of 190 persons.

The second “ 35 “

The third “ 3 “

228

DEATHS.

The whole number of Deaths, in Newton, in 1868, was 136, which is 2 more than in 1867.

The oldest person who died in Newton during the year, was Joseph Appleton, 93 years, 11 months, 22 days old.

DISEASES.		AGES.			
Consumption	15	Under 10 years of age 42			
Heart Disease	10	Between 10 and 20 years of age, 8			
Cholera Infantum	10	“	20	30	“ “ 14
Old Age	9	“	30	40	“ “ 12
Croup	5	“	40	50	“ “ 16
Typhoid Fever	4	“	50	60	“ “ 11
Lung Fever	4	“	60	70	“ “ 10
Scarlet Fever	3	“	70	80	“ “ 14
Dysentery	4	“	80	90	“ “ 7
Accidents	3	“	90	100	“ “ 1
Other Diseases	68				
	<hr/>				<hr/>
	135				135

By the above return, the proportion of deaths to the population has been 1 in about 73. Consumption still leads as a disease among us; but its proportion of victims was far less in 1868 than it has been for many years. In 1858 and 1859, one fourth of all the deaths in Newton were by consumption; in 1860, one sixth; in 1861, one seventh; in 1862, one in seven and three fourths; in 1863, one in six and a half; in 1864, one in five and one half; in 1865, one in six and two thirds;

in 1866, one in five and one half; in 1867, one in six; and in 1868, one in about nine. It is a reason for sincere gratitude that this disease, which is really far more to be dreaded than the Asiatic cholera, seems to be somewhat abating; yet it is the great disease of our Town and State, and probably of New England; and it becomes us, in our changeable climate, to guard against its attacks; for an ounce of prevention is worth more than a pound of cure, or attempts to cure,

POPULATION AND MORTALITY IN NEWTON FOR NINE YEARS PAST.

The following Table is very nearly correct:—

In 1860	Population (U. S. Census)	8,382	Deaths 94	One in 89
1861	"	8,600	" 136	" 63
1862	"	8,700	" 93	" 94
1863	"	8,750	" 149	" 59
1864	"	8,850	" 135	" 66
1865	" (State Census)	8,978	" 127	" 71
1866	"	9,100	" 116	" 78
1867	"	9,310	" 133	" 70
1868	"	9,900	" 136	" 73

It appears, by the above table, that for the last nine years, the average of deaths has been one in about seventy-four of our population; while the average mortality of our State has been about one in fifty-four.

MARSHALL S. RICE, *Registrar*.

Newton Centre, Jan. 27, 1869.

NEWTON CEMETERY.

But a small portion of the residents of Newton are fully aware of the extent and natural advantages of our cemetery. Nowhere can be found a lot of land better adapted to such a purpose than the one that has been chosen in this case. Like all such enterprises, for several years it was obliged to struggle along as best it could, not being able to make the improvements that were demanded by the public. The Town has helped the enterprise as much, perhaps, as could be expected, when we remember that many of the tax-payers own lots in other cemeteries, and would not, of course, be willing to be taxed to pay for improvements here, when they could derive no direct benefit. Year by year additional avenues and paths have been laid out and graded; lots have been sold; monuments erected; trees and shrubs planted; a house and greenhouse built; until the whole presents quite an attractive appearance. But while we have, within a few miles of us, such cemeteries as Mount Auburn and Forest Hills, we can hardly be content to move on at the moderate rate we have been going during the last few years. Since the cemetery was first established, in 1856, our Town has made wonderful advances, so that the Newton of to-day is far in advance of the Newton of over ten years ago. Better houses, better churches, better roads, better gardens, fields, and orchards; and why not better cemeteries? The time was, and that not many years ago, when the burying-ground was a place to be, of all others, most avoided. But a better day has dawned; and now we love to visit and linger near the graves of our dear, departed; to plant trees about their last resting-place, through whose leaves the wind shall make sweet music, chanting requiems to their memory; to plant fair and fragrant flowers, to remind us of the purity of those who have gone before us; to make all cheerful and pleasant, that the grave may be robbed of its terrors, and the place one to be sought and enjoyed, rather than to be shunned or feared. While much has been done, very much remains to be done. The whole area being now over seventy acres, it will at a glance be seen that a large outlay will be required

to prepare the land for use ; to erect a suitable entrance ; to introduce water into the grounds ; trees, shrubs, and plants, and many other things that must be provided for a first-class cemetery. This money must come from the sale of lots, for there is no other source of income. At the present time, the corporation is in debt to some extent, but has a large amount of real estate to show for it — land bought at moderate prices, for the use and improvement of future generations. From fifty to one hundred lots are annually sold ; but this has not furnished a large income. The proprietors, having, at their last meeting, favored the erection of a new entrance the present season, and the trustees being anxious to have the work performed, and a gateway built that shall be a credit to our Town, have voted to erect one forthwith. Now, this and other contemplated improvements will require a larger sum of money than has ever yet been raised in any one year. The trustees have felt it their duty to appeal to the citizens of Newton, and especially to those who have no lot in our cemetery, to come forward and assist us by taking one or more. All the funds derived from this source are immediately expended on the grounds, for improvements, so that every proprietor gets his full share of the advantage. The proposed gateway will be built of stone, and will cost several thousand dollars ; and if more lots are not sold during the coming season than have ever been sold in any other year, then our debt will be materially increased. While our cemetery is becoming so attractive, the lots are sold at very low prices, as compared with those in the more popular ones. Two hundred dollars will secure a lot containing three hundred square feet, all graded and prepared for burial purposes ; while many lots, not quite so well located, can be obtained for one hundred dollars each. None need be shut out from this beautiful place ; and it is the part of wisdom for every head of a family, while he and his are in health, to secure a lot, and have it fitted as his own taste or fancy may suggest. We feel sure, if our citizens would only stop and think upon this matter, very many would be induced to purchase lots this very year. It is well known that delays are dangerous.

There is another thing to which we desire to call the attention, not only of those who may purchase hereafter, but all who now own lots and have failed to make provision for the future care of the same. It is well known that lots, however neatly fitted up, with monuments ever so costly, will, after the lapse of years, become somewhat

dilapidated, unless constantly cared for by some one. The original owner may have passed away, with all others that care anything about the lot, and there is no one to assume the expenses; and the whole goes to ruin. To meet such cases, careful proprietors in the various cemeteries leave an amount in the hands of the trustees and their successors, the income of which shall be devoted to the care and support of their lots forever. This seems to be a very wise provision, and one that we hope our citizens will think of and make without delay.

In conclusion, we express the hope that many may be induced to visit the grounds, select a lot, and thus, besides making a wise provision for the future, help on the improvements so much needed in and about the grounds. The superintendent can always be found at his post of duty, and will be happy to show lots, and give any information in his power.

LIST OF PERSONS

WHO WERE TAXED FOR

REAL AND PERSONAL ESTATE,

IN THE

TOWN OF NEWTON,

In the Year 1868.

Value of Real Estate	\$9,104,567 00

PAGE STREET. From Walnut Street, in the northerly part of Newtonville, northeasterly, across Crafts Street, and Lake Street, to Silver Lake. Distance — 1-4 mile, 5 rods.

PARK STREET. From Washington Street, Newton Corner, — near E. M. Mosher's blacksmith's shop, — past Woodland Park, across Franklin Street, to Sargent Street. Distance — 5-8 mile, 16 rods.

PARKER STREET. From Cypress Street, Newton Centre, across Boylston Street, to Dedham Street, near the residence of Eben Stone. Distance — 1 1-4 mile, 12 rods.

PEARL STREET. From Centre Street, Newton Corner, to Watertown Street. Distance — 5-8 mile, 12 rods.

PELHAM STREET. From Centre Street, Newton Centre, westerly, to Pleasant Street. Distance — 1-8 mile, 10 rods.

PERKINS STREET. From Washington Street, West Newton, southerly. Distance — 49 rods.

PINE STREET. From River Street, West Newton, westerly. Distance — 3-8 mile, 8 rods.

PLEASANT STREET. From Centre Street, Newton Centre, — near Post-Office, — past the residence of C. S. Davis, to Homer Street. Distance — 1-2 mile.

PROSPECT STREET. From Washington Street, West Newton, to Temple Street. Distance — 1-8 mile, 24 rods.

PUTNAM STREET. From Margin Street, West Newton, southerly to Temple Street. Distance — 59 rods.

- RICHARDSON STREET.** From Centre Street, Newton Corner, — near the residence of Mrs. Munroe, — to the school-house, thence to Church Street. Distance — 1-8 mile, 24 rods.
- RIVER STREET.** From Waltham Street, West Newton, — past burying ground, to Lexington Street. Distance — 3-4 mile, 8 rods.
- ROWE STREET.** From Auburn Street, Auburndale, northerly to Emerald Street. Distance — 1-4 mile, 28 rods.
- SARGENT STREET.** From Centre Street, opposite Cabot Street, to Brighton Street, opposite Kenrick Street, near the residence of J. A. Kenrick. Distance — 3-8 mile, 28 rods.
- SCHOOL STREET.** From Washington Street, Newton Corner, — near the residence of Mrs. Watson, — to Pearl Street. Distance — 38 rods.
- SEAVERNS STREET.** From Lexington Street, Auburndale, westerly to Ash Street. Distance — 1-4 mile, 2 rods.
- SHAW STREET.** From Winthrop Street, West Newton, to Lander Street. Distance — 41 rods.
- SHORT STREET.** From Highland Street, West Newton, — near the residence of S. Parsons, — to Otis Street. Distance — 38 rods.
- SOUTH STREET.** From Hammond Street, East Newton, — past the residence of Francis Pettee, — to Ward Street. Distance — 1-4 mile, 8 rods.
- SPRING STREET.** From Winter Street, Upper Falls, to Summer Street, opposite the Methodist Church. Distance — 15 rods.
- STATION STREET.** From Centre Street, Newton Centre, — past Railroad Station and residence of Joshua Bartlett, — to Jackson Street. Distance — 1 mile.
- SUMMER STREET.** From High Street, Upper Falls, — past the Methodist Church, — to Chestnut Street. Distance — 24 rods.
- SUMNER STREET.** From Station Street, Newton Centre, near Railroad Station, to Brighton Street. Distance — 1-2 mile, 16 rods.
- TEMPLE STREET.** From Highland Street, West Newton, — opposite the residence of Galen Merriam, — past the residence of Chas. H. Carrol, to Prospect Street. Distance — 1-4 mile, 12 rods.
- TREMONT STREET.** From Park Street, Newton Corner, — near the residence of D. G. Rawson, — past E. A. Smallwood's cabinet manufactory, to Brighton. Distance — 93 rods.
- TROWBRIDGE STREET.** From Beacon Street, Newton Centre, northerly to Pleasant Street. Distance — 18 rods.

- VERNON STREET.** From Centre Street, Newton Corner, — near the residence of Edwin Chaffin, — to Moore Street. Distance — 1-4 mile, 32 rods.
- VINE STREET.** From Brookline Street, Oak Hill, to West Roxbury line. Distance — 1-4 mile, 10 rods.
- WABAN STREET AND PARK.** From School Street, Newton Corner, across Jewett Street, to Pearl Street. Distance — 1-4 mile, 25 rods.
- WALCOTT STREET.** From Lexington Street, Auburndale, easterly to Rowe Street. Distance — 1-4 mile, 18 rods.
- WALES STREET.** From Washington Street, Lower Falls, to Needham line at Stone Bridge. Distance — 17 rods.
- WALNUT PARK.** From Washington Street, Newton Corner, past the residence of John C. Potter, to Waban Park. Distance — 72 rods.
- WALNUT STREET.** From Crafts Street, Newtonville, southerly across Watertown Street, Lowell Street, and Washington Street, past High School-house, across Homer Street, past Newton Cemetery, across Beacon Street, past Oak Hill Railroad Station, to Centre Street, near the residence of Amos Pierce. Distance — 2 3-4 miles, 10 rods.
- WALTHAM STREET.** From Washington Street, West Newton, — near John Mead's store, — past "Davis School-house," and the residence of Mrs. Sarah Fuller, to Waltham line. Distance — 1 1-8 mile.
- WASHINGTON PARK.** From Walnut Street, Newtonville, to Cary Street. Distance — 1-4 mile, 18 rods.
- WASHINGTON STREET.** From Brighton line, Newton Corner, — near E. A. Smallwood's residence, — through Newton Corner, Newtonville, West Newton, and Lower Falls, to Needham line, at bridge near "Rice's Mill." Distance — 4 7-8 miles, 16 rods.
- WATERTOWN STREET.** From Washington Street, West Newton, — near Railroad House, — past the residences of Adolphus Smith, and J. A. Faxon, to Watertown line. Distance — 1 3-4 mile.
- WARD STREET.** From Brighton Street, East Newton, — at Harbach Corner, — past Ephraim Ward's residence, to Brighton line, near the residence of Daniel Knowles. Distance — 7-8 mile.
- WEBSTER STREET.** From Waltham Street, West Newton, — opposite "Davis School-house," — past the residences of N. T. Allen, and the late Dr. J. H. Brown. Distance — 1-8 mile, 22 rods.

WINCHESTER STREET. From Nahanton Street, South Newton,—near the residence of David Hall, Jr.,—to Boylston Street, near the residence of Mancy Thornton. Distance — 1 1-2 mile, 32 rods.

WINTER STREET. From High Street, Upper Falls, to Chestnut Street, near Loring Wheeler's store. Distance — 22 rods.

WINTHROP STREET. From Perkins Street, West Newton, westerly. Distance — 49 rods.

WOODLAND AVENUE. From Washington Street, opposite the residence of T. C. Severance, past the Female Seminary and over Railroad, to Auburn Street, opposite the residence of Benj. Bourne, Auburndale. Distance — 3-4 mile.

WOODWARD STREET. From Boylston Street,—near Moses Crafts' blacksmith's shop,—past the residence of Samuel N. Woodward, to Beacon Street, near the residence of E. J. Collins. Distance — 1 mile, 28 rods.

RULES AND REGULATIONS

• FOR THE

GOVERNMENT OF TOWN MEETINGS.

Approved by the Court, December 29, 1857.

1st. No final vote shall be reconsidered, unless the person moving the same shall have made a declaration of his intention to do so at the time of its adoption, and shall have been one of the majority acting thereon; and no article in any warrant shall be again taken into consideration, after it has been disposed of, unless ordered by a vote of two thirds of the voters present.

2d. No person shall speak more than twice upon any question, without first obtaining leave of the meeting, except for the correction of an error, or to make an explanation; and not until others, who have not spoken upon the question, shall speak, if they desire it.

3d. All motions submitted for consideration of the Town, shall be in writing, if so required by the presiding officer, or by the meeting.

4th. Every person speaking shall address the chair, standing and uncovered.

5th. No vote fixing the period for closing a ballot shall be reconsidered after such ballot shall have commenced; but it may be in order to extend the period without such reconsideration.

6th. Committees shall be nominated by the presiding officer of the meeting, unless otherwise ordered by a vote of two thirds of the voters present; and in nominations at large, no person shall nominate more than one member of such committee.

7th. All motions to lay on the table, to take from the table, to take any article from its regular order, or to change the order of business, shall be decided without debate.

8th. The duties of the presiding officer shall be determined by the code of Rules governing the presiding officer of the House of Representatives of this Commonwealth, so far as they are adapted to the conditions and powers of the Town.

BY-LAWS.

Approved by the Court, Dec. 29, 1857.

COLLECTION OF TAXES.

ART. 1. The assessment of all taxes shall be completed and a list of the same delivered to the Collector on or before the first day of July of each year.

ART. 2. The appointed time for collecting poll-taxes of persons having no other tax, shall be from the 20th to the 31st of July, and all other taxes from the 10th to the 20th of November of each year.

ART. 3. It shall be the duty of the Collector, during each of said periods, to appoint at least eight different times and places in different parts of the town, when and where he will meet the inhabitants and receive their taxes; and he shall, immediately after receiving the tax-list from the assessors, make out the tax-bills, and send the same to each of said inhabitants and each non-resident, as he can find, with a notice thereon of said times and places, and the penalties of non-payment of said taxes; and the Town shall furnish printed blanks for the use of said Collector.

ART. 4. At the expiration of the time appointed for said payment of taxes, the Collector shall issue a summons to all delinquents; and if any taxes remain unpaid more than ten days after the service of said summons, the Collector shall immediately proceed to collect the same, with legal fees therefor.

REPORTS OF COMMITTEES.

No action shall be had at any Town Meeting on the report of any Committee previously chosen, unless the same shall be specially notified in the warrant for calling said meeting.

PASTURING OF CATTLE OR OTHER ANIMALS IN STREETS AND WAYS.

No person shall pasture cattle or other animals in or upon any of the streets or ways in the Town of Newton, either with or without a keeper, under the penalty of five dollars for each and every such offence; and it shall be the duty of the Selectmen to prosecute every violation of this By-Law; and all fines or penalties collected for such offences, shall be paid to the Treasurer for the use of the Town.

BY-LAWS OF THE TOWN OF NEWTON

CONCERNING

Truant Children and Absentees from School.

Adopted March 2, 1863.

SECT. 1. The Town of Newton hereby adopts the provisions of the forty-second chapter of the General Statutes of this Commonwealth, so far as applicable to Truant Children and Absentees from school, and all the provisions of the two hundred and seventh Chapter of the Acts of 1862, and the several Acts in addition thereto, or in amendment thereof.

SECT. 2. Any person convicted of any offence described in said Acts, or either of them, shall be punished by fine not exceeding twenty dollars, or by confinement in any institution of instruction, house of reformation, or suitable situation, which shall be provided for the purpose, for a term not exceeding one year.

SECT. 3. The Selectmen of the Town shall provide a suitable lock-up, or institution of instruction, or house of reformation, or some other suitable place in the Poor-house belonging to the Town, or some other place in the Town aforesaid, or in the County of Middlesex, which shall be assigned and used for the confinement of persons convicted and sentenced to confinement under said Acts.

SECT. 4. Three Truant Officers shall be annually chosen in the Town of Newton, at its Annual Meeting in March, to serve one year, whose duty it shall be to make complaints of all persons who have violated any provisions of the Acts aforesaid, or either of them.

SECT. 5. The Selectmen of the Town shall fix the amount of compensation of said Truant Officers, for their services, as they shall think just, and the sum shall be paid from the Treasury of the Town.

SECT. 6. It shall be the duty of the School-Committee, and of the Teachers of the Public Schools in said Town, to report the name of every person or persons violating any or either of said Acts, to the Truant Officers of the Town, that they may be complained of therefor.

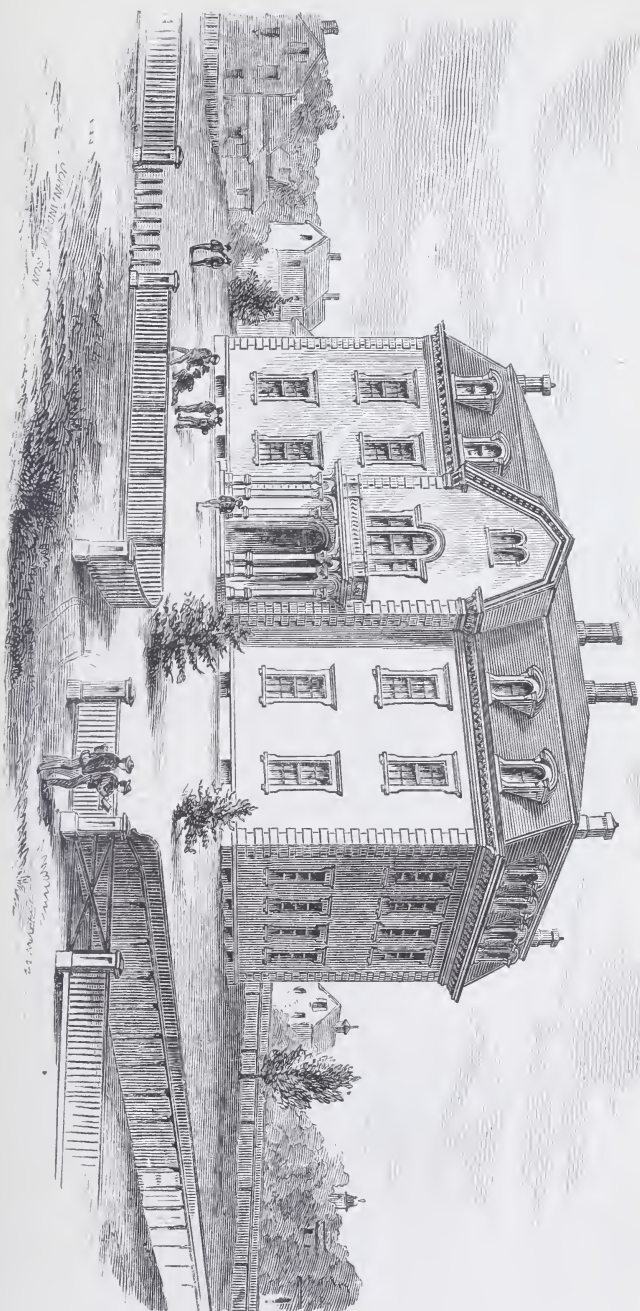

To the foregoing By-Laws, the following was appended; viz., —

SUPERIOR COURT, SUFFOLK, SS. January Term, 1863. I approve the By-Laws of the Town of Newton, relative to Truant Children and Absentees from School, hereto annexed.

THOMAS RUSSELL,

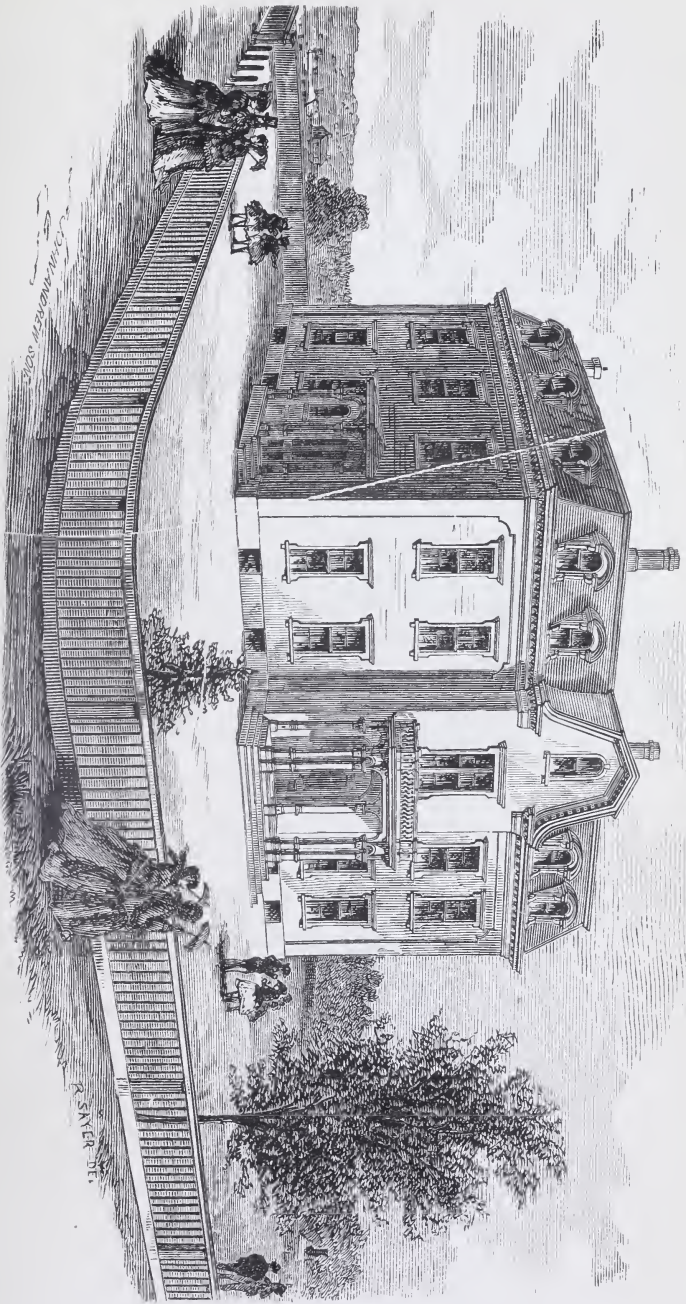

Justice of Superior Court

REPORT.

TO THE CITIZENS OF NEWTON :—

Your School-Committee respectfully submit their ANNUAL REPORT of the condition of the Public Schools.

We have been deeply sensible of the peculiar responsibilities of our office, imposed by the extent, as well as the nature, of the interests committed to us. The Board of School-Committee are vested, by the laws of the Commonwealth, with the exclusive charge and administration of all the Public Schools in town. All school property is placed in their custody. The disbursement of all moneys appropriated by the town, for the support of schools, is committed to their judgment and discretion. And always responsible, as they must be, for a careful performance of their duties, and exercise of their powers, an additional fidelity and vigilance is demanded when generous provision is made by the town for all the wants of the schools, and every facility afforded for the promotion of their interests. The undoubted excellence of our schools; the distinction they have long enjoyed; the special commendation they have excited among public educators; and, now, the provision made by the town, in respect of school buildings, — unparalleled, we may safely say, among the towns of the Commonwealth, — have likewise constrained us to devote our best judgment and attention to the discharge of our duties.

We are thus enabled, in reviewing the year, to regard with much satisfaction the continued prosperity and

steady improvement of our schools. No marked change in their general condition is apparent; but there has been that harmonious and healthy progress, which tends to confirm a high standard, and to give to it the force of an established law, of which no infraction can be excused. The schools have met our reasonable expectations, in every respect; although, as of all human institutions, our hopes and desires of them are far from being realized.

Our teachers, with hardly an exception, have had considerable experience in the profession. To fill the vacancies that have occurred, we have been able to secure apt and experienced teachers, already possessed of the acquirements and qualifications essential to success. They are faithful, conscientious, and earnest; discreet in discipline; patient in labor, and ambitious of the good-will of pupils and parents. No complaint has reached us of undue severity of discipline. That last resort, permanent exclusion on account of refractory or immoral conduct, has not been required in a single instance; and the relations between the teachers and those whom they serve, have been, to a gratifying extent, friendly and pleasant. We have abundant evidence that our high appreciation of the worth of our teachers is shared by the whole community.

More resignations than usual have occurred during the year. Of the eight Grammar Masters in service at the beginning of the year, four have sought other fields of labor; and in two cases the Grammar Schools have been subjected to the administration of no less than four different Principals in the course of the year. The High School, also, as will be seen by the Report upon that school, has suffered a similar experience. It was with peculiar regret that we received the resignations of such

successful and popular teachers as Messrs. Hale, Bancroft, Brigham, Hill, Winship, and Stickney. It is a gratifying circumstance, however, attesting also the character of our schools, that with the exception of Mr. Brigham, who enters another profession, these gentlemen were constrained to leave us by no other consideration than calls to more extended and responsible duties in the same direction. Of the female teachers who commenced the year, three have resigned by inducement of matrimony, and but one for other cause. The appointments made to fill these vacancies have proved so fortunate, that the schools do not appear to have suffered any further detriment than is inseparable from such changes.

The average attendance has fallen somewhat below that of the previous year. The decrease, however, is confined to the Primary Schools, and may be referred mainly to an unusual illness among the children in the latter part of the year.

A few changes have been made in Text-Books. Sargent's series of Readers, in use for many years, has been superseded by Hillard's; Anderson's History of the United States has been substituted for Berard's; and Worcester's Dictionary has been adopted as the standard of orthography and pronunciation, without displacing Webster's excellent work as general authority.

It will be seen by the appended statistics that the number of children of school age in town, is 219 larger than in the previous year, and that 176 more pupils were instructed in our schools. This increase has demanded the establishment of new schools of the Primary grade, in Districts 1, 6, and 7, two of which commence with the new year. We have also been constrained to provide Assistants in the Grammar schools of Districts 2, 3, and 4.

Except in District 2, this was not warranted so much by the number of pupils, as by the number of classes — too many to be taught with good advantage by a single teacher. It afforded at the same time an opportunity to promote a lower class and thus to relieve the other schools.

By the forthcoming Report of the Secretary of the Board of Education, it appears that for the school-year, 1867-68, Newton holds the fourth place among the towns of the State in respect of school appropriations; Nahant, Brookline, and Arlington only taking higher rank. If we consider the amount expended in erecting and maintaining school buildings in that year, it undoubtedly holds the highest place. The appropriation for 1867-68 was \$20.01 for each child in town between five and fifteen years of age. In respect of percentage of taxable property appropriated for schools, it held for the same year the twenty-sixth place, the percentage being .00423. The appropriation for the last year, though larger in amount, is relatively less, being .00304 of the valuation and \$19.24 for each child of school age.

We append the following further statistics: —

Number of School-houses in town	14
Number of Public Schools	39
(Viz.: 1 High, 8 Grammar, 12 Intermediate, and 18 Primary.)	
Increase for the year	3
Number of Teachers employed	54
(Viz.: High School, 4; Grammar Schools, 18; Intermediate Schools, 13; Primary Schools, 18; Vocal Music, 1.	
Increase for the year	6
Number of different teachers employed during the year . . .	70
Number of children in town of school age, May 1, 1868 . .	2,292
An increase of	219
Whole number attending school during the year	2,170
An increase of	176
Percentage of attendance	80.93
Number of pupils over 15 years of age	194

Without exception, the several villages have now substantial, commodious, and elegant school edifices, well adapted to the present and prospective wants of the schools. The expenditures in this particular have been large, but we believe the future will justify them, in the increased attractiveness of our villages and the character and progress of the schools. Within the last three years the town has expended \$170,000 in this direction, and the total value of our school property is not less than \$298,000. All needed provision has been so generously and promptly made, that, with the ordinary increase of population, no further appropriations for this purpose will be required for some years. We have prefixed to our Report inexpensive cuts of two of the earlier built of our school-houses, which may be followed by others in subsequent Reports, if found to serve the public desire.

In fixing the salaries of our teachers for the ensuing year we have adopted the principle employed in the cities and many of the towns, of regarding length of service. Without doubt all teachers become more valuable as they become better acquainted with the schools and the citizens, and perfect their methods and systems; and by adding to the salaries of established teachers what may be properly saved from the compensation of those who are recent and less experienced, we may be able to retain teachers who receive calls to other places.

In place of the present general salary of Principals of Grammar schools (\$1700), we have therefore established these salaries at \$1600 for the first year's service, \$1700 for the second, and \$1800 as the maximum. For female teachers, \$500 for the first year, \$550 for the second, and a maximum of \$600, instead of the present general salary of \$550. We believe this system will serve the interest of the town and prove satisfactory to the teachers.

We have carefully estimated the probable expenses of the ensuing year, and taking into account the additional requirements of our new school-houses and the increased expense of our corps of teachers, we recommend an appropriation, therefor, of \$49,000, and a further appropriation of \$7000 for incidental expenses.

We now commend to your consideration the accompanying special Reports of the Sub-Committees of the different grades of schools.

JOHN B. GOODRICH, *Secretary,*

For the Committee.

HIGH SCHOOL.

The High School enters upon the tenth year of its history in a most prosperous and promising condition. Though it has lost two Principals during the year,—Mr. E. B. Hale, now Superintendent of Schools in Cambridge, and Mr. T. W. Bancroft, now Professor of Rhetoric and Belles-Lettres in Brown University,—and though, for five weeks, the exercises were necessarily suspended, in consequence of the alteration of the building, the school is more flourishing than at any former period. The number of pupils in attendance is one hundred and thirty-six, which fact of itself shows the necessity there was of the recent enlargement. The teachers have labored earnestly and faithfully with the classes. The examinations have been very satisfactory, and have shown an intelligent comprehension of principles on the part of the scholars, and not simply a verbal, mechanical repetition of the words of the text-books. The Committee consider themselves very fortunate in

having secured the services of Mr. F. A. Waterhouse, the present Principal, who, coming with the highest recommendations, has already justified their expectations, and will, we believe, raise the character of the school, till it shall compare favorably with any in the State.

The advantages for obtaining a complete and thorough education which are afforded here are unsurpassed; but, in order that the school may take and keep a prominent position, the high standard of scholarship must be strictly maintained. All those branches which are taught in the lower grades must have been perfectly learned. The processes of arithmetic, the principles of grammar, the knowledge of geography, the ability to read, spell, and write well, must have been previously acquired before one should be admitted to these privileges. This is for the interest of each pupil, as well as of the school. Unless this is done, the High School will be such only in name.

We have a right to expect, also, that those who enjoy these facilities will show their appreciation of them by industry and fidelity. We desire to see an *esprit du corps*, a sense of honor, a love of excellence, characterizing the school, which will be manifest in the deportment and manners, as well as in the diligence of its members.

The elective system, which was adopted last year, and by which a scholar may pursue either an English or a classical course, has thus far worked well; and we are glad to mention the fact, that Latin, although an optional study, has been chosen by a majority of the pupils. As a means of enabling a person to understand the meaning of words and the analysis of sentences, and as a basis for acquiring the modern languages, the study of Latin is invaluable. There is no necessity for any opposition

between the sciences and the classics. An acquaintance with both is essential to the highest culture. An educated man must not be ignorant of the world in which he lives, nor of the literature of the nations of past ages. Why should not some knowledge of both of these be acquired? There can be no danger from hard study, if one will only take sufficient exercise, avoid late hours, and be careful to preserve his physical health. We should educate all our faculties, and not be satisfied with a partial development. We should undervalue nothing that will strengthen and enrich the mind, or help us to think, to write, and to speak effectively. We should appreciate the worth both of theoretical and practical knowledge, and add to the study of words, the study of things. There is truth in the remark, that "we are shut up in schools and colleges and recitation-rooms for ten or fifteen years, and come out, at last, with a bag of wind, a memory of words, and do not know a thing. The old English rule was, 'All summer in the field, and all winter in the study.' The sight of a planet through a telescope is worth all the course on astronomy; the shock of the electric spark in the elbow outvalues all the theories; the taste of the nitrous oxide, the firing of an artificial volcano, are better than volumes of chemistry."

We would earnestly urge all those who are now in the Grammar Schools, to complete the entire course, to go through the High School, and, if possible, to go to college. The worth of instruction increases as they advance; and what is of equal value with a finished education! What will give them so much power and influence, what will afford them so much satisfaction and delight, as that wisdom whose price is above rubies, and which is not to be valued with pure gold! One of our

most eloquent and accomplished writers has said, that he would rather occupy the bleakest nook of the mountain, with the wild wolf and the rattlesnake for his nearest neighbors, with a village school, well kept, at the bottom of the hill, than dwell in a paradise of fertility, if he must bring up his children in lazy, pampered, self-sufficient ignorance. The period of education should be extended as long as possible; for experience proves that, in the majority of cases, but little consecutive study is done after school is left. With the best appliances for obtaining a knowledge of the languages and the sciences, furnished to every scholar free of cost, it would seem that all who can appreciate the advantages of mental growth and culture will hasten to improve them.

We commend the High School to the renewed favor and interest of the community, and trust that they will see that it is provided with every thing which will make it what it ought to be—the crown and glory of our school system. Every year should witness some addition made to its resources. Its library should be increased, and supplied with all needful books of reference. Its walls should be adorned with engravings, maps, models, representations of medals and coins, and whatever will illustrate the scenery, the history, the manners and customs of ancient Greece and Rome. Such a hall would speak to every beholder, and would inspire the pupils with a love and an enthusiasm for classical study. Newton has been generous and lavish in providing the most ample accommodations for her children. Yet it is not the outside, but the inside of our school edifices, that is most important. It is not the structures, but the instruction that is given in them, that has made famous the great schools of other lands. It would be far better to secure

and keep the best teachers, than to erect the most costly buildings, for the training of youth. We hope that the graduates of this school will always keep their interest in it, that it may never lack friends who will be devoted to it, and who will endeavor to meet all its wants.

In conclusion, we ask the parents to co-operate with the teachers, to visit the school, to become acquainted with the methods that are used, and to communicate their own views and wishes in reference to their children. So only can the best results be attained. The weekly cards of approbation, which are given to all those who are perfect in scholarship and deportment, the monthly reports, which, it is requested, may be examined with care, and returned with the signature of the parent, will show what progress each one is making. The spirit that prevails in the school is excellent; and, with devotedness on the part of the teachers, with perseverance and diligence on the part of the pupils, with the concurrent sympathy and effort of the parents and the Committee, the High School will continue to be an honor to the town, and a means of incalculable benefit to all who shall avail themselves of its privileges.

GRAMMAR SCHOOLS.

This department has suffered more than any other in change of teachers; but the close of the year finds them all, with a single exception, in a satisfactory condition. The successive changes in the management of the school in District 4, could hardly fail to affect seriously its progress. It is now, however, rapidly recovering itself, and we may expect from it creditable results under its new Principal.

We have seen little to condemn and much to commend in these schools. The different branches are taught intelligently, diligence is easily secured, and orderly conduct appears to be spontaneous. We must except from unqualified approval, however, in some cases, the Grammar of the graduating classes. A greater proficiency than was generally exhibited is demanded for a fair preparation for the High School, where English Grammar is not distinctively pursued. Gymnastics and music were well employed; and we note with special praise the general and remarkable excellence of the penmanship of all the classes.

Various collateral exercises, depending greatly in their value upon the enthusiasm and tact of the teacher, have added much to the results of the year.

We have been pleased to observe a general endeavor, on the part of teachers, to present subjects to their pupils in an interesting and intelligent manner, seeking to attract and enlighten the mind of the pupil, and to lead it to *originate*, instead of arbitrarily exacting a technical and, perhaps, illy-comprehended statement already prepared by another. Still, there is no grade of common schools to which we look for greater actual results, or of which we

expect so much. In the lower schools, we are confined to the elements of things. We are satisfied on account of what we are promised in the future. Proficiency in technical knowledge is the superstructure hereafter to be laid. But, as the child matures, and enters the Grammar School, and, in most cases, approaches his last opportunities of school instruction, we look for positive results. Determine these results by the test of the text-book, and we are generally satisfied, and congratulate ourselves. Other tests are more difficult, uncertain, and obscure; and we generally neglect to apply them. The result is, that the teacher, well knowing that the first test must be answered, and that, in the general judgment, he must stand or fall by it, pursues a system which fails to satisfy the demands of a sound education. The teacher deserves no blame for this. Whenever a general appreciation of more varied and comprehensive efforts is apparent, the teacher will be as sensitive to the popular idea of duty as he is now. Until then, we shall be disappointed in the contrast between the results of our superior advantages and the few months' schooling of the children of other days, in the little red school-house. This contrast certainly does not lie in the greater knowledge of our children in arithmetic, grammar, or geography. It should consist in this — that, in former days, common-school studies were pursued for the sake of the amount of absolute knowledge imparted by them; but that to-day, the chief intellectual object of common-school education is to supply the mind with materials to work with, and instruments to work by, and to develop, train, and strengthen its powers by discipline.

Now the fact is, the three branches of study which principally engage the teacher's efforts, do not, unless the text-book is employed *as a help, rather than as an all-sufficient*

means, greatly promote available intelligence and mental resources. The study of arithmetic is generally considered as a comprehensive discipline of the mind. Yet Sir William Hamilton says, "If we consult reason, experience, and the testimony of ancient and modern times, none of our intellectual studies tend to cultivate a smaller number of faculties in a more partial manner than mathematics."

Grammar, too, if taught mechanically, according to the "book," affords but little mental discipline. Unless the earliest and most persistent object sought is to give the pupil an insight to the philosophy of language, and to lead him into an appreciation of the principles of its structure, a deplorable failure will be the natural result. We have heard children recite glibly about "co-ordinate conjunctions" and "complex adjective elements of the third class," who could not correct the false syntax of a simple sentence.

We might speak of the barren rote-work to which the study of geography is often reduced. But the object of these strictures is only to suggest and insist upon the plain necessity, on the part of every teacher, of keeping constantly in view the true object of school instruction, and of withdrawing from the text-book whenever his own mental resources afford better means of *helping* and leading the mind of the child. As before said, we are glad to observe in our schools an increased appreciation of these principles. Some of the above suggestions appear in a late Report of Mr. Harrington, Superintendent of the New Bedford Schools, which we should like to see in general circulation among the friends of education.

We have long thought that an occasional meeting, including all our teachers and, perhaps, the Committee, for an interchange of views and the consideration of questions

pertaining to the schools, would be interesting and profitable. We propose that an early meeting of this kind be held, to be continued if found to be desirable.

We again commend the teachers of the Grammar Schools for their devoted and successful labors through the year, and we trust that they will continue to merit as they have in the past, the gratitude of parents, the esteem and love of pupils, and the intelligent approval of the public.

JOHN B. GOODRICH,

For the Sub-Committee.

INTERMEDIATE SCHOOLS.

There are thirteen Intermediate Schools in the various sections of the town — two at Newton Centre, two at the Upper Falls, one at the Lower Falls; one at Auburn-dale, two at West Newton, two at Newtonville, and three at Newton Corner. There should have been three at West Newton, as the one taught by Miss Simmons has been very large and cumbersome, requiring an assistant. The completion of the new building will enable the Committee to make this much desired change.

The Sub-Committee on this grade have made their regular quarterly examinations of these schools, with the exception of one omission at the Upper Falls, in the summer, when the schools there were closed earlier than usual, to enable the Committee to move the old school-house. They have made, in all, fifty visits, additional to the frequent ones required of each in his own locality, and have endeavored to study carefully the methods of instruction and discipline employed in them, to make

such suggestions as seemed needed, and, at the close of the year, by personal examination of the classes, to ascertain the relative proficiency of the pupils in the various schools. The teachers have, without exception, labored with commendable zeal, in season and out of season, for the advancement and well-being of their schools; and we believe we do not state too much, when we say that these schools were never, as a whole, in so good condition, both in regard to thoroughness of instruction and in general good order, as at the close of the year just past. And yet, much remains to be done.

The principal things required in these schools are thorough instruction and drill in vocal gymnastics, reading, and spelling, with arithmetic taught through the fundamental rules of written arithmetic, the Primary Geography, Swift's Natural Philosophy, writing, and singing. Of these, spelling — one of the most important — is too little taught, as a whole. The spelling-book is not used enough. Worcester's Primary Speller should be finished in the Primary School, and the Comprehensive in this grade—not merely gone through with, but *learned*. The time spent in learning to spell in the Grammar School is usually waste time, except such as may be needed for review, to refresh the memory. It has been our experience, after many years of observation, that a boy or girl who enters our Grammar Schools a poor speller, generally leaves it a poor speller, after a four years' course. Spelling is one of those things, that, unless learned while a person is young, never can be learned. Not so with

ARITHMETIC,

which seems to be the natural bent of the Yankee mind, and is probably better taught than most of the other

branches. In some schools, time is wasted by too much memorizing. For instance: the teacher reads a long example; the pupil, if he has previously committed it to memory, repeats it; or, failing to do so, the next tries, and so on, until the question is correctly stated. Then follows a set form for explanation; and if that *form* is deviated from in a single expression, it goes to the next. Much time might be saved by letting the pupil have the book for the more lengthy examples. The above is no exaggeration of what has been practised in some of our schools. Some of our teachers say they can get better work and more activity from their pupils without ever letting them have the book in recitation; yet the tendency has been towards wasting time. Beside the work in the book, the pupils should have a good deal of arithmetical practice, by the teacher's giving original examples in adding, subtracting, multiplying, and dividing, both at the class recitation, and with the whole school, as a general exercise. We have seen, even in our Primary Schools, the pupils very ready in performing these examples. In beginning the study of written arithmetic, it is of the greatest importance that children learn to write numbers correctly and readily. Too many scholars go through the Grammar Schools, and apply for the High School, without knowing how to write numbers. This is taught best where writing decimals and whole numbers are taught together. Decimals ought not to be made the bugbear that some arithmeticians would make them, by putting them away in another part of the book, and adding the word *fractions* to the name. A unit is a part of a ten, the same as a tenth is of a unit. The four fundamental rules, with notation and numeration, can be better taught with no book but Walton's Intellectual, and

his arithmetical card, than by the use of the Written Arithmetic alone. The latter book is hardly needed till the principles of these rules are mastered. As good a class as ever was seen in the town of Newton was taught in this way; and it was impossible to give them a number of nine or twelve places in whole numbers, and as many in decimals, which they could not write and tell all about it — and this an Intermediate class.

GEOGRAPHY

has received its due share of attention, yet with various results. Map-drawing should be practised in all the classes in geography, from the Primary through the Common-School Geography. In no other way can the pupil get so accurate a knowledge of the forms and relative sizes of states and countries, the direction of the mountain ranges and rivers.

It is hardly necessary to say that the results of the instruction in this branch have been much more satisfactory in those schools where map-drawing has been almost daily taught, than in those schools where little or no attention has been paid to it.

Reading, in some of our schools, might be better taught, and consequently improved, by introducing more vocal gymnastics, spelling by sounds, etc., especially at the beginning of every reading lesson. This discipline of the vocal powers is needed in the whole course of school instruction, from the sub-primary, to the graduation from the High School. Were this practised more, we should hear fewer poor readers and speakers in the pulpit and on the platform.

A good deal of interest has been manifested in the study of Swift's Natural Philosophy, and the children

seemed more awake to the subject than to any other study.

The singing showed the good effect of instruction received in that department.

Teachers probably meet with their full share of discouragements in the Intermediate Schools, as the boys and girls, to a certain extent, are of that age when parents can find profitable employment for them in the mills in some of our villages, or on the farm, which, in too many instances, induces them to keep their children out of school a part of the year. This is detrimental to the advancement of the pupil. Many of them never enter the Grammar School; for after being put back once or twice into classes much younger than themselves, they become discouraged, and finally leave school altogether. Teachers do not feel like devoting much extra time to this class, as frequently they are dull scholars, are uneasy under discipline, and do not seem to reward the efforts of the teacher. As a general thing, teachers should devote the main part of their time to the poorer part of the class, and adapt their instruction to their capacities. These scholars need it more than the better ones.

Individual promotion is a good thing in the younger classes, and is much more easily made there, than in the Grammar School. There is a tendency in some villages, to keep the pupils too long in the Primary Schools, so as to have a smart first class to exhibit. Thus we find the lower grades crowded, while the upper ones are small.

It is an old saying, a good one, and one that cannot be too often repeated, that, "As is the teacher, so will be the school."

A teacher who goes to her work in the morning, finds fault with her pupils most of the time during the day, and

gladly turns the key of the school-room door at four o'clock, will not meet with the highest success. Decision and energy are needed by the teacher, correction is needed by the pupils; but continual fault-finding, or scolding, soon ceases to have its desired effect. Continual correction of the same fault in pupils, tends to make them careless and less for it. Correction should be of such a nature, varying, of course, to meet the various dispositions of the children, as to make its repetition unnecessary, certainly not to be desired by the offender.

A teacher should not depend too much, in recitation, upon her book. "Make, daily, a thorough preparation for your work, so that when your class is called, you are as familiar with the contents of the book, as your class ought to be, and master of the subject," is the precept of our Normal Schools, and one that should be followed by teachers, in all grades of schools.

By these general remarks, we have endeavored to present a fair statement of the condition of our Intermediate Schools, and, by suggesting deficiencies, to stimulate all to labor earnestly in the future to promote their best welfare.

HORATIO F. ALLEN,

For the Sub-Committee.

PRIMARY SCHOOLS.

The Committee to whom was intrusted the supervision of the Primary Schools, have taken great pleasure in witnessing the steady developing of the infant mind, as well as the faithful and earnest spirit in which the several teachers pursue their daily work.

They have made their regular quarterly visits to all the

Schools, while the several members have made more frequent visits to the Schools in their immediate neighborhood.

We do not deem it necessary, if it were expedient, in our Report, to institute any comparisons as to excellence, when all are in so satisfactory a condition, and when the teachers, without exception, are working so successfully; and yet, among the seventeen teachers employed in these schools, we naturally find a marked diversity of gifts, and consequently, different degrees of excellence. Some are evidently born teachers, and by intuition quickly perceive the working of the youthful mind, and as quickly adapt their teaching to the capacity of the pupil. Others, with no less zeal and faithful, loving devotion, fail, in a measure, to address themselves to the understanding of the pupil, or to stimulate the imagination and engage the heart; yet these are acceptable and successful teachers, in common estimation, while the first are in the highest and truest sense educators.

The more your Committee have examined into the philosophy of teaching, and the curious development of the human mind, the more thoroughly have we been impressed with the importance of securing the highest order of talent for the Primary Schools.

Formerly, almost any one possessing an ordinary education, was thought competent to teach a school for beginners. This mistake, as we deem it, arose from a wrong conception of the true nature of a teacher's profession, as well as from ignorance as to the growth and natural development of the infant mind, in all its varied and multiform faculties.

A child of six or seven years, that can pronounce small primer words fluently, and spell them correctly, is looked

upon as bright and intelligent. This may be true, but this exhibition, perhaps, is simply the result of a good memory, good in itself, but of infinitely small importance compared with the uniform and healthful expansion of all the faculties. The natural order of development should be more carefully studied by the teacher, while more freedom should be given her in her methods.

We are endowed, in common with the lower animals, with the faculties of hearing, seeing, tasting, and smelling, as well as of observation. These may be largely cultivated, and only through such cultivation can we lay a broad and generous foundation for a noble superstructure. Yet in our schools, many of them much crowded, the teacher finds almost no time to depart from the regular programme, for the pupil must be prepared according to the book, to enter the next grade, regardless of nature's teachings, which are peculiarly God's methods; for should the pupil be judged incompetent, the teacher's reputation suffers, though she labor never so earnestly and successfully as a true educator, in forming in her pupils careful and exact habits of observation, that in having eyes they see, not only the objects God has created all around them, but their beauty and utility.

How infinite the field thus opened to the teacher and the child! and with what bounding joy will the child enter such an opening vista! feeling none of the restraints of the book, which too often hamper the gushing spirit of childhood, while narrowing the sphere and dampening the enthusiasm of the true teacher.

We have said thus much upon the general subject of primary teaching, because we deem it of infinite importance, that, in any system of education, the groundwork should be thoroughly understood and appreciated; for

then only shall we see a structure rise typical of a noble manhood and womanhood, worthy of our age, and of the generous support given to the schools of Newton. To secure such results, it is only necessary that we give more freedom to our teachers in their methods, and more flexibility to our grade lines; that we reckon a pupil's progress, not so much by the number of pages gone over, as by the systematic growth of the mind, body, heart, and soul.

The whole number of pupils in our Primary Schools at the close of the year was 877; while the average attendance during the year has been remarkably good, testifying to the interest of the pupils, and a due appreciation on the part of the parents of the excellence of our schools.

We would renewedly commend these teachers to the sympathy and intelligent co-operation of parents. By your frequent visits to the school, show your interest in them personally, and by your cheerful acquiescence in their reasonable requirements, that you fully appreciate their arduous services in your behalf. Be careful that through inadvertence they are not socially ostracized; assure them of a cordial welcome at your fireside, and in the social circle; for in no way can you so lighten the responsibility constantly bearing them down, and under which so many faithful teachers sink.

In four of the larger villages, Sub-Primary schools have been established, composed of children of the youngest school age, and we recommend that such be formed in all districts when the primary class is large. In these schools, the aim of the teacher is to present school duties in their most attractive guise; more freedom is allowed than in the other schools, and the time is devoted to the simple elements of reading, by the use of phonic charts,

physical culture, singing, etc. ; while the inventive faculties are stimulated by the use of building blocks, drawing and printing on the blackboard. We deem it of vital importance that this opening porch, as it were, of the temple of science, be made attractive and inviting ; for when once a love of school is secured, the future success is made certain, and the pupil enters upon his upward course with a brave and joyous spirit, sure harbinger of success.

The teachers in these schools are peculiarly adapted to their work ; and the results thus far command our warm approbation. The Committee, in closing, extend to our primary teachers, one and all, their hearty commendation for their singular devotion and reasonable success.

GEO. E. ALLEN,

For the Sub-Committee.

MUSIC.

The Committee on Music in our schools have given such time to the examination of this department as they have been able to, in their recent visits to the schools ; and, upon the whole, were well pleased with the general character of the exercises in the various schools at the closing examinations.

The duties of a teacher, in this department, have steadily increased, from year to year, until his whole time has been employed in his weekly visits to the Intermediate and Grammar Schools. We are satisfied that no effort has been wanting, on the part of the teacher, in imparting thoroughness, both in theory and practice ; and the results are such as to fully justify the expenditure for this department of education.

Whatever tends to social culture and refinement, should be carefully fostered and encouraged in our schools; and we are convinced that nothing tends more directly to secure this, than the practice of singing. How the recollection of the songs of our childhood entwines itself into our very being, cheering many an otherwise lonely hour; softening, with its sweet harmonies, all discord and ill temper, and strengthening us against temptations! We feel that our schools, excellent though they be, would fall short of their highest success, were this department wanting.

We would suggest, however, that in future, less time be given in the Intermediate Schools to the theory, and more to the practice of singing; for while the former is often dry and uninteresting, the second is ever heartily welcomed by the youngest pupils. The chief end to be sought, should be the cultivation of the ear, to appreciate the different shades of tone, and to develop a correct taste in execution; while in the Grammar Schools, a systematic drill may be given in the simple elements, interspersed with singing. In this way, the time will pass pleasantly, as well as profitably, and the music-teacher will be greeted by smiling faces as he enters the several school-rooms.

Our teacher, Mr. A. R. Trowbridge, who has filled the position since its establishment, closes his labors with the school-year, on account of ill health; and the Committee gratefully tender him their thanks for his faithful and arduous labors, giving himself to the schools without reserve. His success, while gratifying to the Committee, has been duly appreciated by the pupils, who, we feel sure, will join the Committee in their sincere wish that a needed rest will bring a complete restoration to health.

For the Committee,

G. E. ALLEN.

STATISTICAL TABLE.

MORAL PHILOSOPHY. Wayland's.

GEOLOGY. Hitchcock's or Tenney's.

ASTRONOMY. Olmstead's.

REGULATIONS OF SCHOOL TIME.

SECTION 1. The scholastic year consists of forty weeks, divided into terms as follows:—

First Term to commence the first Monday of February, and continue twelve weeks.

Second Term to commence the first Monday of May, and continue nine weeks.

Third Term to commence the second Monday of September, and to embrace twenty weeks, including a recess of one week at the annual Thanksgiving.

SECT. 2. In addition to the above described vacations, the schools shall be closed every Saturday, and the following holidays:—Washington's Birthday, Fast Day, 17th Junè, Independence Day, Christmas and New Year's Day. Also, the teachers may leave their schools one half day in each term for the purpose of visiting other schools, and may *attend* the meetings of the County Teachers' Association,—notice of any intended absence to be first given to the Local Committee. In case of emergency, the Chairman may also suspend the schools for a day, his order to that effect to be directed, when practicable, to the Local Committee.

SECT. 3. There shall be two sessions of the schools,—a morning session of three and a half hours, from the first day of April to the first day of November, and of three hours during the remainder of the year; and an afternoon session of two and a half hours during the entire year, with an intermission, whenever practicable, of two hours. In *very* bad weather, the two sessions may be combined in one, of four hours and a half. The High School shall have but one session, of five hours, commencing at half past eight in the morning.

Provided that nothing in this section shall be so construed as to prevent teachers from detaining scholars, for delinquencies, a reasonable time after the regular school-hours.

SECT. 4. The recesses shall be as follows:—one in the morning, of twenty minutes, commencing one hour and a half before the close of school; and one in the afternoon of fifteen minutes, commencing one hour after the opening. Besides these recesses for all the schools, there shall be one for those of the primary grade, of ten minutes, one hour after the opening of the morning session.
